Manage your smart home with Apple's HomeKit platform. Smart home devices are everywhere these days: you can buy internet-connected light bulbs, thermostats, door locks, sensors and dozens of other products. But these devices aren't very smart on their own. Apple's HomeKit platform offers a way to integrate, monitor, control and automate smart home devices from a wide variety of manufacturers. Using the built-in Home app on an iOS device, perhaps along with third-party apps you can connect to your various smart devices, see what they're up to, control them and even get them to operate on a schedule or respond to changing conditions in your home automatically. Even with HomeKit, however, home automation can be a daunting prospect. That's why TidBITS Managing Editor Josh Centers wrote *Take Control of Apple Home Automation*. The book walks you carefully through every step of the process, showing you how you can start with a basic system that costs less than \$50 and work your way up to as much complexity as you want or need. And you don't have to be a computer geek to
