Current Progress and Challenges in the Development of a Hepatitis C Virus Vaccine Steven K.H. Fount, Thomas F. Baumert, 2019-01-22 More than 70 million people worldwide are infected with hepatitis C virus a major cause of liver cirrhosis liver failure and hepatocellular carcinoma world wide In the last decade this cancer has emerged as the second leading cause of cancer death and the global burden is increasing by two million new infections per year mainly due to injection drug use An effective vaccine will be the most effective means to contain the spread of this virus worldwide The articles in this Research Topic describe the progress that has been made towards a preventive vaccine and the challenges that still need to be overcome to ultimately achieve this goal *Viral Safety and Evaluation of Viral Clearance from Biopharmaceutical Products* Fred Brown, Anthony S. Lubiniecki, 1996 Assurance that biopharmaceuticals do not contain unwanted infectious agents is a vital safety consideration in the use of these products This can only be ensured by careful screening of the cells and other materials used in their production and subsequent testing of the final product This publication reports the proceedings of an international conference which focused on the methods of how to avoid contamination of cell cultures with virus during the production process of biologicals with the aim of providing harmonized guidelines to ensure product safety Scientists from industry and regulatory agencies present updates on the current state of knowledge about assays for viral contamination and procedures for inactivation and removal Risks associated with the processing of biopharmaceuticals are identified and data on the actual experiences of testing and industrial laboratories are presented and discussed in the context of the clinical setting Drawing together a wealth of new data this book will be essential reading for all scientists concerned with the development production and quality control of biopharmaceutical products *Why Vaccines to HIV, HCV and Malaria Have So Far Failed - Challenges to Developing Vaccines against Immunoregulating Pathogens* Shuo Li, Magdalena Plebanski, Peter Smooker, Eric J. Gowans, 2016-09-14 Despite continuous progress in the development of anti viral and anti bacterial parasite drugs the high cost of medicines and the potential for reinfection especially in high risk groups suggest that protective vaccines to some of the most dangerous persistent infections are still highly desirable There are no vaccines available for HIV HCV and Malaria and all attempts to make a broadly effective vaccine have failed so far In this Research Topic we look into why vaccines have failed over the years and what we have learn from these attempts Rather than only showing positive results this issue aims to reflect on failed efforts in vaccine development Coming to understand our limitations will have theoretical and practical implications for the future development of vaccines to these major global disease burdens *Comprehensive Biotechnology*, 2011-08-26 The second edition of Comprehensive Biotechnology Six Volume Set continues the tradition of the first inclusive work on this dynamic field with up to date and essential entries on the principles and practice of biotechnology The integration of the latest relevant science and industry practice with fundamental biotechnology concepts is presented with entries from internationally recognized world

leaders in their given fields With two volumes covering basic fundamentals and four volumes of applications from environmental biotechnology and safety to medical biotechnology and healthcare this work serves the needs of newcomers as well as established experts combining the latest relevant science and industry practice in a manageable format It is a multi authored work written by experts and vetted by a prestigious advisory board and group of volume editors who are biotechnology innovators and educators with international influence All six volumes are published at the same time not as a series this is not a conventional encyclopedia but a symbiotic integration of brief articles on established topics and longer chapters on new emerging areas Hyperlinks provide sources of extensive additional related information material authored and edited by world renown experts in all aspects of the broad multidisciplinary field of biotechnology Scope and nature of the work are vetted by a prestigious International Advisory Board including three Nobel laureates Each article carries a glossary and a professional summary of the authors indicating their appropriate credentials An extensive index for the entire publication gives a complete list of the many topics treated in the increasingly expanding field

Critical Infrastructure
Robert Radvanovsky, Allan McDougall, 2023-12-06 Critical Infrastructure Homeland Security and Emergency Preparedness Fifth Edition represents a continuation of research and recommendations from the past editions that spans nearly twenty years of focusing on critical infrastructure CI protection Over that time the operating threat and technical environments have changed drastically The doctrines that have guided practitioners across various domains have also evolved due to changing demands This is a natural result when doctrines collide and gradually evolve toward and coalesce into a singular understanding of an issue Those who have practiced in this domain have seen these collisions in the past an example being the convergence of physical security and cyber information and operational technologies security It is with this backdrop and understanding of the domain that the authors not only describe the current state of affairs but also provide a means through which researchers and participants such as practitioners students industry stakeholders owners and operators in various government and private CI sectors can look at trends and changes in the domain that may not be apparent elsewhere The authors identify shifts in today's environment that move the thinking away from simply the robustness of systems to their adaptability and resilience They outline design processes that likewise are evolving away from the simple adoption of best practices to risk based management and even towards structures based on engineering driven principles These changes are not occurring at a unified pace and the differences can result in tensions between certain communities However the debate itself is indicative of the critical thinking that is beginning to take hold within each infrastructure domain Critical Infrastructure Fifth Edition continues to critically examine the evolving importance of our critical infrastructure to our society recognizing the underpinning value of cyber technology and how physical infrastructures and delivery models impact and affect people and society
