Diaspora and Memory, 2016-08-01 Experiences of migration and dwelling in displacement impinge upon the lives of an ever increasing number of people worldwide with business class comfort but more often with unrelenting violence Since the early 1990s the political and cultural realities of global migration have led to a growing interest in the different forms of diasporic existence and identities The articles in this book do not focus on the external boundaries of diaspora what is diasporic and what is not but on one of its most important internal boundaries which is indicated by the second term in the title of this book memory It is not by chance that the right to remember the responsibility to recall are central issues of the debates in diasporic communities and their relation to their cultural and political surroundings The relation of diaspora and memory contains important critical and maybe even subversive potentials Memory can transcend the territorial logic of dispersal and return and emerge as a competing source of diasporic identity The articles in this volume explore how shaped by the responsibilities of testimony as

well as by the normalizing forces of amnesia and forgetting and political interests memory is a performative figurative process rather than a secure space of identity

Age, Narrative and Migration Katy Gardner, 2002-06 Whilst the vast majority of recent research on identity and ethnicity amongst South Asians in Britain has focused upon younger people this book deals with Bengali elders the first generation of migrants from Sylhet in Bangladesh The book describes how many of these elders face the processes of ageing sickness and finally death in a country where they did not expect to stay and where they do not necessarily feel they belong The ways in which they talk about and deal with this and in particular their ambivalence towards Britain and Bangladesh lies at the heart of the book Centrally the book is based around the men and women's life stories In her analysis of these Gardner shows how narratives play an important role in the formation of both collective and individual identity and are key domains for the articulation of gender and age Underlying the stories that people tell and sometimes hidden within their gaps and silences are often other issues and concerns Using particular idioms and narrative devices the elders talk about the contradictions and disjunctions of transmigration their relationship with and sometimes resistance to the British State and what they often present as the breakdown of traditional ways In addition to this the book shows that histories stories and identity are not just narrated

through words but also through the body an area rarely theorized in studies of migration

**Language, Identity and Symbolic Culture** David Evans, 2019-11-28 Language is integral to the construction of personal socio cultural and socio political identities Language Identity and Symbolic Culture closely investigates the relationship between language and identities offering a comprehensive yet progressive view of how linguistics relates to development and education both in theoretical and real world applications Progressing from a theoretical core examining the connection between language and individual identity this book moves on to look at the wider socio political discourse involving the marginalization and resistance of communities in the world Beginning with the philosophical paradigms of language Evans questions whether language shapes personal identities in its daily use or whether language is simply a tool for describing rather than creating the world Extrapolating on this the contributors utilise case studies from across the globe to see how these linguistic perspectives are played out in the real world considering the role of language in issues surrounding power colonization marginalization and education Language Identity and Symbolic Culture offers a view of language identity conflicts around the world and an understanding of the opportunities of political and cultural emancipation created through language and open discourse
