**Instructions:** Read the following passage about Nvidia. Then answer the following questions.

July 9, 2025 – Nvidia, a company that makes computer chips, briefly became the first company ever to reach a market capitalization valued at \$4 trillion. This means all of its shares added together were worth \$4 trillion in the stock market. This is because GPUs can process a lot more information at once than other computer components, helping computers do tasks like understanding speech or recognizing images.

By the end of the day, Nvidia’s shares had gained 1.8%, making its total market value \$3.97 trillion. Last year, it reached \$1 trillion in value and then tripled in about a year, growing faster than other big companies such as Apple and Microsoft. Investors believe Nvidia will keep growing because more companies
