Wyoming Wild Life, 1939 *Reading Cats and Dogs* Françoise Besson, Zélia M. Bora, Marianne Marroum, Scott Slovic, 2020-12-30

Throughout the world people spend much of their time with animal companions of various kinds, frequently with cats and dogs. What meanings do we make of these relationships? In the ecocritical collection *Reading cats and Dogs*, a diverse array of scholars considers the philosophy, literature, and film devoted to human relationships with companion species. In addition to illuminating famous animal stories by Beatrix Potter, Jack London, Italo Svevo, and Michael Ondaatje, readers are introduced to the dog poems of Shuntaro Tanikawa, a Turkish documentary on stray cats as neighborhood companions, and the representation of diverse animal companions in Cameroonian novels. *Focusing on Stray and Feral Companions: The Usefulness of Companion Animals and Problematizing Companion Animals*. *Reading Cats and Dogs* aims both to confirm and topple readers' assumptions about the fellow travelers with whom we share our lives, our streets, and fields, and our planet. Fifteen contributors from various countries reveal the aesthetic, ethical, and psychological complexities of our multispecies relationships, demonstrating the richness of ecocritical animal studies.

The Publishers Weekly, 2007 **The Hidden Life of Deer** Elizabeth Marshall Thomas, 2009-08-27

The animal kingdom operates by ancient rules, and the deer in our woods and backyards can teach us many of them, but only if we take the time to notice. In the fall of 2007 in southern New Hampshire, the acorn crop failed, and the animals who depended on it faced starvation. Elizabeth Marshall Thomas began leaving food in small piles around her farmhouse. Soon she had over thirty deer coming to her fields, and her naturalist's eye was riveted. How did they know when to come all together, and why did they sometimes cooperate, sometimes compete? Throughout the next twelve months she observed the local deer families as they fought through a rough winter, bred fawns in the spring, fended off coyotes, a bobcat, a bear, and plenty of hunters, and made it to the next fall when the acorn crop was back to normal. As she hiked through her woods, spotting tree rubbings, deer beds, and deer yards, she discovered a vast hidden world. Deer families are run by their mothers. Local families arrange into a hierarchy. They adopt orphans; they occasionally reject a child; they use complex warnings to signal danger; they mark their territories; they master local microclimates to choose their beds; they send countless coded messages that we can read if only we know what to look for. Just as she did in her beloved books *The Hidden Life of Dogs* and *Tribe of Tiger*, Thomas describes a network of rules that have allowed earth's species to coexist for millions of years. Most of us have lost touch with these rules, yet they are a deep part of us from our ancient evolutionary past. *The Hidden Life of Deer* is a narrative masterpiece and a naturalist's delight.
