Choose from this selection of phrases to add to your descriptive writing about the rainforest.

## Similes

as humid as a summer bath  
as thick as wet fog  
as colourful as a splattered rainbow  
as damp as dew  
as green as an emerald  
as dark as a cavern  
as dense as a ball of string  
as crowded as a city street  
as fragrant as a flower market  
as noisy as a motorway

## Metaphors

The walls of leaves were impenetrable.  
A snake rested on a nest of vines.  
The smell of flowers was a warm embrace.  
Fireflies danced through the night.  
The trickle of water was a whisper.  
The sea of green spread out below.  
Monkey calls floated down through the branches.  
The forest floor was a carpet of earth and roots.  
The sounds of rain was never ending.  
The canopy was a ceiling of moving art.

**Metaphor in Illness Writing** Anita Wohlmann, 2022-06-13 Metaphor in Illness Writing argues that even when a metaphor appears problematic and limiting it need not be dropped or dismissed Metaphors are not inherently harmful or beneficial instead they can be used in unexpected and creative ways This book analyses the illness writing of contemporary North American writers who reimagine and reappropriate the supposedly harmful metaphor illness is a fight and shows how Susan Sontag Audre Lorde Anatole Broyard David Foster Wallace and other writers turn the fight metaphor into a space of agency resistance self knowledge and aesthetic pleasure It joins a conversation in Medical Humanities about alternatives to the predominance of narrative and responds to the call for more metaphor literacy and metaphor competence New Methodological Approaches to Foreign Language Teaching Thomas H. Schmidt, Laura Torres-Zúñiga, 2017-06-23 This volume explores how the traditional academic disciplines of linguistics translation literature and cultural studies can contribute to or be integrated into the teaching of a foreign language by means of innovative methodologies techniques and instruments The book begins with a selection of essays on applied linguistics that share some significant findings in the context of second or foreign language acquisition It then examines the ways in which linguistics translation theory literature and cultural studies are brought into the foreign language classroom not just as objects of study but also as vehicles for language learning By presenting studies on four main foreign languages English Spanish French and German the collection offers to the foreign language profession an opportunity for the sharing and comparison of strategies across languages at both the secondary and higher education level The text is a valuable resource for language teachers with a more philologically oriented background who would like to learn how to apply their research knowledge and experience to the design and implementation of new methodological approaches **Current Approaches to Metaphor Analysis in Discourse** Ignasi Navarro i Ferrando, 2019-09-02 This volume takes up the challenge of surveying the present state of a variety of approaches to the identification analysis and interpretation of metaphor across communication channels situational contexts genres and social spheres It reflects three foremost trends of present metaphor research namely the communicative approach the cognitive modelling approach and the multimodality approach These trends are considered as areas of research emerging on the ground of the Conceptual Metaphor Theory initiated by Lakoff The book intends to show their concomitances as well as mark their diversifying paths The aim is to bring about and make apparent the many connections among assumingly different trends stemming from CMT Whereas discrepancies between communicative and conceptual perspectives might seem irredeemable the book emphasizes and claims that the background framework of CMT provides a solid foundation for collaboration and mutual influence Consequently the analysis of metaphor usage in context may provide insights for cognitive modelling proposals The analysis of cognitive configuration of conceptual domains may in turn illuminate our understanding of communicative decisions in discourse The integration of multimodal metaphor analysis puts forward the idea that diverse

modal manifestations of metaphor reveal the symbiosis between communicative and cognitive stances The various subject areas and methodologies illuminate the scene of current research in the field The poignant contributions open far reaching avenues into the realm of human thought and discourse **Journal of Anthropological Research** ,1973 **Towards**

**Moundbuilders of the Amazon** Anna Curtenius Roosevelt,1991 Moundbuilders of the Amazon shows that sophisticated archaeological bioarchaeological and geophysical techniques of remote sensing are fully applicable to tropical sites Additionally the comprehensive use of such techniques by all archaeologists doing fieldwork anywhere could revolutionize archaeology allowing archaeologists to look inside sites rather than simply excavate them Using a variety of remote sensing techniques Roosevelt documents the existence of a major moundbuilding culture possessing monumental architecture and a rich artistic tradition on the lowland tropical floodplain of Marajo Island at the mouth of the Amazon River in Brazil from about 400 A D to about 1 300 A D Marajo Island at the mouth of the Amazon River is about the same size as Switzerland or Belgium A well developed civilization existed there from about 400 A D to 1 300 A D comparable in many ways to the Inca civilization to the west or to the Aztec and Maya cultures to the north or in some interesting ways to the Pharonic cultures which developed at the mouth of the Nile Because this civilization had no stone at its disposal it expressed its monumental architecture in packed dirt which washed back into the alluvial floodplain long ago effectively preventing archaeological discovery until the recent development of sophisticated techniques of remote sensing and reconstruction Key Features Reports on the most extensive stratigraphic excavations ever of an ancient Amazonian civilization adapted to a floodplain environment Introduces the first use of geophysics for archaeology in non specialized language Illustrates for the first time the elaborate art of a complex society that was indigenous to the tropical lowlands Describes monumental sites rich polychrome pottery and the first extensive biological remains ever recovered in an Amazonian site Proves that sophisticated archaeological bioarchaeological and geophysical techniques of remote sensing are fully applicable to tropical sites Shows that the comprehensive use of such methods could revolutionize archaeology by allowing archaeologists to look inside sites rather than simply excavate them Provides examples which prove that the theories about the limitations of the tropical environment for cultural evolution are simply untrue and were based on faulty knowledge of the region and its archaeology
