Work management to optimise occupational radiological protection at nuclear power plants , 2009 Since 1992 the Information System on Occupational Exposure ISOE has provided a forum for radiological protection professionals from nuclear power utilities and national regulatory authorities worldwide to discuss promote and co ordinate international co operative undertakings for the radiological protection of workers at nuclear power plants The ISOE objective is to improve occupational exposure management at nuclear power plants by exchanging relevant information data and experience on methods to optimise occupational radiological protection This report on work management provides practical guidance on the application of work management principles as a contribution to the optimisation of occupational radiological protection It recognises that while work management is no longer a new concept continued efforts are needed to ensure that good performance outcomes and trends are maintained in the face of current and future challenges The focus of this report is

therefore on presenting the key aspects of work management that should be considered by management and workers to save time doses and money supported by updated practical examples from within the ISOE community **Nuclear Energy**,1995

Nuclear Politics in America Robert J. Duffy,1997 Duffy's work traces nuclear politics from the creation of a powerful subgovernment through the public lobby reforms of the late 1960s and early 1970s and the deregulatory backlash of the Reagan years. He demonstrates that while policies did change in the 1970s they did not change as much as other accounts have suggested and that the industry continued to receive considerable federal support. The book is particularly significant for extending the discussion of nuclear policy through the Bush and Clinton years including the controversy over waste disposal new licensing procedures enacted in the 1992 Amendments to the Atomic Energy Act and the effects of deregulation of electric utilities Amazon.com viewed August 24 2020 The Aeroplane,1947-07 Public Works for Water, Pollution Control, and Power Development, and Atomic Energy Commission Appropriations for Fiscal Year 1971 United States.
