[An Introduction to Property Valuation](#) Alan Millington,2013-11-05 It is now 25 years since the first edition of this book was written and the objectives of the fifth edition remain the same as those of the first edition that is to provide an introduction to and general background reading for the subject of property valuation It is directed not just at would be surveyors and valuers but at all those who may be interested in getting an understanding of property valuation

**An Introduction to Property Valuation** Alan Fred Millington,1975 *Business Value and Sustainability* Ki-Hoon Lee,Stephan Vachon,2016-08-17 This book connects business sustainability to supply network based value creation and enhancement and tests a number of key propositions in complex supply networks to identify key challenges Examining practical issues such as carbon trading green product development worker safety child labour and relations with local communities Business Value and Sustainability advances the understanding of sustainability in supply network management In presenting a supply management perspective including a tighter control of the supply base and the development of supplier capability through collaboration with NGOs the authors contribute to both the theoretical advancement and practical development of this field The book aims to raise the sustainability standards of businesses in an increasingly complex and inter and intra connected global supply network

*The Future of Planning* Yvonne Rydin, 2013-09-11 For the past half century the planning system has operated on the basis of a growth dependence paradigm. It has been based on market led urban development and has sought to provide community benefits from a share of development profits. However we do not live in a world where growth can be taken for granted and we are more aware than previously of the implications for well being and sustainability. This timely book provides a fresh analysis of the limitations of the growth dependence planning paradigm. It considers alternative urban development models ways of protecting and enhancing existing low value land uses and means of managing community assets within the built environment. In each case it spells out the role that a reformed planning system could play in establishing a new agenda for planning. The book will be of relevance to planning students, planning professionals and planning academics as well as urban policy specialists more generally.

*Sport and Physical Activity in Catastrophic Environments* Jim Cherrington, Jack Black, 2022-11-08 This book considers the ability of individuals and communities to maintain healthy relationships with their surroundings before, during and after catastrophic events through physical activity and sporting practices. Broad and ambitious in scope this book uses sport and physical activity as a lens through which to examine our catastrophic societies and spaces. Acknowledging that catastrophes are complex overlapping phenomena in need of sophisticated interdisciplinary solutions this book explores the social, economic, ecological and moral injustices that determine the personal and emotional impact of catastrophe. Drawing from international case studies this book uniquely explores the different landscapes and contexts of catastrophe as well as the affective qualities of sporting practices. This includes topics such as DIY skateparks in Jamaica, former child soldiers in Africa, the funding of sport, recreation and cultural activities by extractive industries in northern Canada, mountain biking in the UK and urban exploration in New Zealand. Featuring the work of ex professional athletes, artists, anthropologists, sociologists, political ecologists, community development workers and philosophers this book offers new perspectives on capitalism, nature, sociality, morality and identity. This is essential reading for academics and practitioners in sociology, disaster studies, sport for development and political ecology.

**Professional Ethics in Construction and Surveying** Greg Watts, Jason

Challender, Anthony Higham, Peter McDermott, 2021-04-26 This textbook responds to the increasing demand for practical industry aligned ethical practices in quantity surveying, construction management and related AEC professions. *Professional Ethics for Construction and Surveying* addresses how existing ethical standards can be pragmatically applied to both private and contracting practice with case studies aligned with the ethical requirements of the main professional bodies. After an introduction to ethics the authors present real world situations where the minimum legal and contractual requirements necessitate the combination of professional judgement and ethical decision making. They outline how such situations arise, then address how decisions can and should be made that are in keeping with the moral, contractual and CSR requirements with cases covering the building lifecycle from procurement to handover. Consequently the book brings together ethical

theory existing worldwide ethical standards and the requirements of the RICS the CIOB and the ICES with the authors experiences of examining candidates for entry into the professional bodies The result is a professionally focused textbook aimed at vocational learners at both undergraduate and postgraduate taught levels and practitioners in construction engineering architecture and the wider built environment Smith and Roberson's Business Law Richard A. Mann, Barry S. Roberts, 2003 This updated classic features a comprehensive traditional black letter law presentation of business law topics Also topics that reflect AACSB requirements are covered including all topics on the business law portion of the CPA exam Its uniquely located end of chapter cases give excerpted facts and decisions to preserve the language of the court
