Proceedings of International Conference on Communication and Artificial Intelligence Vishal Goyal, Manish Gupta, Seyedali Mirjalili, Aditya Trivedi, 2022-05-09 This book is a collection of best selected research papers presented at the International Conference on Communication and Artificial Intelligence ICCAI 2021 held in the Department of Electronics Communication Engineering GLA University Mathura India during 19-20 November 2021. The primary focus of the book is on the research information related to artificial intelligence networks and smart systems applied in the areas of industries, government sectors and educational institutions worldwide. Diverse themes with a central idea of sustainable networking solutions are discussed in the book. The book presents innovative work by leading academics, researchers and experts from industry. *Proceedings of Eighth International Congress on Information and Communication Technology* Xin-She Yang, R. Simon Sherratt, Nilanjan Dey, Amit Joshi, 2023-08-31 This book gathers selected high quality research papers presented at the Eighth International Congress on Information and Communication Technology held at Brunel University London on 20-23 February 2023. It discusses emerging topics pertaining to information and communication technology (ICT) for managerial applications, e-governance, e-agriculture, e-education and computing technologies, the Internet of Things (IoT) and e-mining. Written by respected experts and researchers working on ICT, the book offers a valuable asset for young researchers involved in advanced studies. The work is presented in four volumes. *Industrial Internet of Things Security* Sunil Kumar Chawla, Neha Sharma, Ahmed A. Elngar, Prasenjit Chatterjee, P. Naga Srinivasu, 2024-10-28 The industrial landscape is changing rapidly and so is global society. This change is driven by the growing adoption of the Industrial Internet of Things (IIoT) and artificial intelligence (AI) technologies. IIoT and AI are transforming the way industrial engineering is done, enabling new levels of automation, productivity and efficiency. However, as IIoT and AI become more pervasive in the industrial world, they also offer new security risks that must be addressed to ensure the reliability and safety of critical systems. *Industrial Internet of Things Security: Protecting AI Enabled Engineering Systems in Cloud and Edge Environments* provides a comprehensive guide to IIoT security, covering topics such as network architecture, risk management, data security and compliance. It addresses the unique security challenges that the cloud and edge environments pose, providing practical guidance for securing IIoT networks in these contexts. It includes numerous real world case studies and examples, providing readers with practical insights into how IIoT security and AI enabled industrial engineering are being implemented in various industries. Best practices are emphasized for the readers to ensure the reliability, safety and security of their systems while also learning the latest developments in IIoT security for AI enabled industrial engineering systems in this rapidly evolving field. By offering step by step guidance for the implantation process along with best practices, this book becomes a valuable resource for practitioners and engineers in the areas of industrial engineering, IT, computer engineering and anyone looking to secure their IIoT network against cyber threats. **Intelligent Systems and Industrial Internet of Things for**

Sustainable Development C. Kishor Kumar Reddy,P. R Anisha,Marlia Mohd Hanafiah,Srinath Doss,Kari Lippert,2024-05-10

The book studies emerging and sustaining technologies for applications of Industry 5.0 to develop technological solutions to address numerous real life challenges to solve sustainable development related issues It identifies limitations pitfalls and open research questions in industry 5.0 discusses real time problems and challenges with equivalent solutions with a focus on sustainable growth to develop humanization and environmentally friendly intelligent system applications It analyses applications enabled by Industry 5.0 such as healthcare supply chain smart framing remote sensing production in manufacturing and cloud manufacturing It also includes the difficulties and problems posed by the organization between robots and humans on the assembly line to maintain sustainability Addresses key challenges in implementing intelligent systems in IoT based applications including issues ranging from cost and energy efficiency to availability and quality of service Explores the technologies to allow human machine association and its impact on consumption and sustainability Provides sustainable solutions to emerging industrial problems especially in healthcare manufacturing remote sensing environmental engineering Examines need for data pre processing classification prediction Cluster Analysis Mining Multimedia Text and Web Data Advanced machine learning techniques for scientific programming in Industry Presents success stories in the form of case studies of IIoT IIoRT Big Data Intelligent Systems Deep Learning in Industry 5.0 era The text is for postgraduate students professionals and academic researchers working in the fields of computer science and information technology especially for professionals and researchers interested in the technological side of sustainable development
