Claim:

There are different aquatic systems with diverse organisms.

Evidence	Reasoning/Justification
Aquatic ecosystems have abiotic - temp, light, salinity, depth	Different organisms can tolerate different factors
Some organisms prefer fresh water vs. saltwater. Bull sharks + manatees tolerate both	Bull sharks and manatees are very different, but tolerate same conditions
Depth reduces light and increases pressure. Organisms deal with this differently.	Many types of adaptations exist to survive in these conditions
The geography of an aquatic environment can determine the life forms present.	Continental shelf gets lots of light, so there's many living things. Not so in the abyss.
Photosynthesis takes place in the neritic zone.	It is the most productive area of the ocean. Plankton are base of food chain.
Metabolism is affected by temp. Many species are cold-blooded.	Organisms can migrate or must have adaptations to survive.

African American literature has changed in startling ways since the end of the Black Arts Era. The last five decades have generated new paradigms of racial formation and novel patterns of cultural production, circulation, and reception. This volume takes up the challenge of mapping the varied and changing field of contemporary African American writing. Balancing the demands of historical and political context with attention to aesthetic innovation, it considers the history, practice, and future directions of the field. Examining various historical forces shaping the creation of innovative genres, the turn to the afterlife of slavery, the pull toward protest, and the impact of new and expanded geographies and methods, this Companion provides an invaluable point of reference for readers seeking rigorous and cutting edge analyses of contemporary African American literature.
