Appraisal of emerging evidence from Bosniak version 2019 to artificial intelligence. Provides in-depth clinical reviews in radiology providing actionable insights for clinical practice. Presents the latest information in the field under the leadership of an experienced editorial team. Authors synthesize and distill the latest research and practice guidelines to create these timely topic based reviews.

Classification of Musculoskeletal Trauma P. B. Pynsent, 1999-08-26. Classification of fractures and soft tissue injuries is an essential aid in the diagnosis and management of injuries, the assessment of outcomes and in clinical research. When many systems are available for a particular injury, this can cause confusion and controversy over management. In this invaluable book, the three editors provide a comprehensive review of all of the known musculoskeletal trauma classification systems in a single volume. A team of contributors has sought out original versions of classification systems wherever possible and these have been presented in chapters according to the site of injury. Advances in Clinical Radiology 2019, 2019-07-26. Publishing its first volume in 2019, Advances in Clinical Radiology was established to review the year's most important questions in clinical radiology. A distinguished editorial board headed by Dr Frank Miller identifies key areas of major progress and controversy and invites preeminent specialists to contribute original articles devoted to these topics. These insightful overviews in radiology bring concepts to a clinical level and explore their everyday impact on patient care.
