**Measuring Alternative Work Arrangements for Research and Policy** National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Committee on National Statistics, Committee on Contingent Work and Alternative Work Arrangements, 2020-11-07 Business structures employment relationships job characteristics and worker outcomes have changed in the United States over the last few decades in some ways unpredictably A high level of interest exists among policy makers and researchers in addressing

concerns about the future of work in the United States These concerns are heightened by the perceived fracturing of relationships between workers and employers the loss of safety net protections and benefits to workers the growing importance of access to skills and education as the impacts of new technologies and automation are felt and the market based pressure that companies face to produce short term profits sometimes at the expense of long term value These issues as well as related ones such as wage stagnation and job quality are often associated with alternative work arrangements AWAs which include independent contractor and other nonemployee jobs work through intermediaries such as temporary help agencies and other contract companies and work with unpredictable schedules although they also pertain to many standard jobs A better understanding of the magnitude of and trends in AWAs along with the implications for job quality is needed to develop appropriate policies in response to the changing nature of work

**Measuring Alternative Work Arrangements for Research and Policy** reviews the Contingent Worker Supplement CWS of the Current Population Survey CPS for the Bureau of Labor Statistics BLS in the U S Department of Labor The CWS provides key measures of temporary contingent work alternative work arrangements and the gig economy Disagreements however exist among researchers policy makers and other stakeholders about the definitions and measures of these concepts and priorities for future data collection The report also reviews measures of employment earnings and worker well being in temporary and alternative work arrangements that can be estimated using household survey data such as those generated by the CWS as well as measures that can be produced using administrative commercial and combined data sources The comparative advantages and complementarities of different data sources will be assessed as well as methodological issues underpinning BLS s measurement objectives
