The Dark Social Toija Cinque,Alexia Maddox,Robert W. Gehl,2023-11-07 This book explores how people interact online through anonymous communication in encrypted hidden or otherwise obscured online spaces Beyond the Dark Web itself this book examines how the concept of dark social broadens the possibilities for examining notions of darkness and sociality in the age of digitality and datafied life The authors take into account technical moral ethical and pragmatic responses to ourselves and communities seeking to belong in of the dark Scholarship on the Darknet and Dark Social Spaces tends to focus on the uses of encryption and other privacy enhancing technologies to engender resistance acts Such understandings of the dark social are naturally in tension with social and political theories which argue that for politics and acts to matter they must appear in the public light They are also in tension with popular narratives of the dark recesses of the web which are disparaged by structural powers who seek to keep their subjects knowable and locatable on the clear web The binary of dark versus light is challenged in this book The authors provocation is that practices of dark resistance motility and power are enacted by emerging data cultures This book draws together scholarship activism and creativity to push past conceptual binary positions and create new approaches to darknet and dark social studies The Dark Social Online Practices of Resistance Motility and Power will be a key resource for academics researchers and advanced students of media studies cultural studies communication studies research methods and sociology This book was originally published as a special issue of Continuum Journal of Media Cultural Studies

The Impact Equation Chris Brogan,Julien Stanwell Smith,2012-10-25 Anyone can write a blog post but not everyone can get it liked thirty five thousand times and not everyone can get seventy five thousand subscribers But the reason we ve done these things isn t because we re special It s because we tried and failed the same way you learn to ride a bike We tried again and again and now we have an idea how to get from point A to point B faster because of it Three short years ago when Chris Brogan and Julien Smith wrote their bestseller Trust Agents being interesting and human on the Web was enough to build a significant audience But now everybody has a platform The problem is that most of them are just making noise In The Impact Equation Brogan and Smith show that to make people truly care about what you have to say you need more than just a good idea trust among your audience or a certain number of followers You need a potent mix of all of the above and more Use the Impact Equation to figure out what you re doing right and wrong Apply it to a blog a tweet a video or a mainstream media advertising campaign Use it to explain why a feature in a national newspaper that reaches millions might have less impact than a blog post that reaches a thousand passionate subscribers Consider the phenomenally successful British singer Adele For most musicians onstage banter basically consists of yelling Hello Cleveland But Adele connects with her audience pausing between songs to discuss a falling out with her friends or the drama of a break up Each of these moments comes off

as if she were talking directly with you and you can easily relate Adele has Impact As the traditional channels for marketing selling and influencing disappear and more people interact mainly online the very nature of attention is changing The Impact Equation will give you the tools and metrics that guarantee your message will be heard *Social Media Marketing For Dummies* Shiv Singh, Stephanie Diamond, 2020-01-22 Make friends and sell things to people through social media Social media technology is restlessly inventive providing thousands of awesome ways for you to market your business inexpensively and on a large scale often directly into the pockets of consumers But in the proliferating ever changing world of tweets influencers handles and alerts it can be hard to know where to begin and then to evaluate what's actually working for you In the new edition of *Social Media Marketing for Dummies* leading SMM voices Shiv Singh and Stephanie Diamond clear away the confusion and show you the smartest most effective ways to plan launch manage and assess your campaigns and then iterate and optimize for increased success Incorporating the latest trends and presented in a friendly easily digestible step by step style you'll find the ultimate blueprint for developing your best SMM strategy In no time you'll find out how to line up with Facebook Twitter Tumblr and Google develop a unique and compelling voice and influence your key audience all the way to the bank Choose the best SMM combination for you Avoid common mistakes and pitfalls Track your customers from awareness to retention Try out the latest stuff that really works Whether your organization is large or small it simply doesn't pay to be shy Find your voice get social and chat your way to attracting and keeping new customers today Breviarium philosophiae scholasticae Eugène Grandclaude, 1886
