*Internet Memes and Copyright Law* Brian Chun Lok Leung, 2025-09-30 This book explores the intricate relationship between copyright law and internet meme culture challenging an assumption that copyright is a barrier to digital creativity Using the lens of internet memes to analyse copyright law in the context of participatory remix culture the book confronts a common perception that copyright is the destroyer of internet memes on social media platforms Following the European Union's Copyright Directive widely known as the Meme Ban this book critically examines whether copyright might instead be reimagined to foster rather than inhibit re creations that define internet meme culture The book argues that this culture directly challenges copyright's core assumptions and proposes a new holistic approach to copyright that distinguishes between traditional and emergent forms of creative processes Arguing for a flexible interpretation of copyright that limits private proprietary rights in the case of internet memes it provides a legal framework to support socio cultural discourse without undermining copyright's foundational principles Covering core copyright concepts such as authorship idea expression originality fair dealing and user rights the book provides a compelling argument as to how copyright can adapt to the digital age as a protector of cultural expressions ensuring that internet memes are not only preserved but celebrated The book will be of interest to researchers in the field of copyright law the law of emerging technologies and intellectual property law

*Darwin's Dangerous Idea* Daniel C. Dennett, 1996-06-12 Proponent of Charles Darwin's theory of evolution discusses how the idea has been distorted and the correct way to think about evolution and examines challenges to the theory and its impact on the future of humans

*Perspectives on Imitation: Imitation, human development, and culture* Susan L. Hurley, Nick Chater, 2005 A state of the art view of imitation from leading researchers in neuroscience and brain imaging animal and developmental psychology primatology ethology philosophy anthropology media studies economics sociology education and law

**Sense and Goodness Without God** Richard Carrier, 2005-02-23 If God does not exist then what does Is there good and evil and should we care How do we know what's true anyway And can we make any sense of this universe or our own lives Sense and Goodness answers all these questions in lavish detail without complex jargon A complete worldview is presented and defended covering every subject from knowledge to art from metaphysics to morality from theology to politics Topics include free will the nature of the universe the meaning of life and much more arguing from scientific evidence that there is only a physical natural world without gods or spirits but that we can still live a life of love meaning and joy

**Mesmerization** Gee Thomson, 2008 In the modern Western world hundreds if not thousands of contagious ideas spread by word of mouth or through the media spells or memes make up contemporary culture and affect just about

every aspect of our daily life Some of the most powerful of these spells form the core of Mesmerization In this highly visual publication the many facets of each spell are dissected and analysed within a unique graphic formula that exposes and encapsulates its meaning and purpose The most successful of such constructs are the creation of the media the image makers advertising executives newspaper editors creatives designers photographers and film producers who make up the ranks of the creative elite Their dreams of affluence comfort and wellbeing are being emulated the world over More than we know they determine what we believe how we behave and think and control our decisions as to what gets made what gets seen what gets heard But there are cracks in this wonderland Psychological disorders drug dependency obesity gun crime and social addictions are on the rise Worldwide the gaping disparity between rich and poor nations religious unrest disease and famine resource scarcity and fears over climate change head the agenda The influence and aspirations of our lifestyles are central to these issues How can we make headway in confronting our wider realities when we have an image machine that is totally at loggerheads with the need for restraint By revealing the collective power of these insidious cultural influences Mesmerization is a challenge to the creative industry to those who control the motivational drivers underpinning the global psyche In their hands rests the ability to change and transform future behaviour This publication provides the catalyst

**The Theory of Evolutionary Relativity** Ezra Niesen, 2008 *Waves of Change* Patrick Callioni, 2010 Written in the middle of a global economic crisis this book is about a better future Patrick Callioni identifies and describes the major waves of change that are coming our way over the next decade or so and then provides practical advice on what to do or avoid doing to benefit most or suffer least from what is to come He describes some of the problems with the present regime of regulation We are regulating to catch the motes of dust floating in the air rather than the beams that end up poking out the eyes of our financial markets and suggests regulation should focus on rewarding the good rather than punishing the bad He also analyzes some of the behavior that helped to create the Credit Crunch They took healthy debt mortgage debt that was likely to be repaid mixed it up with toxic debt mortgage debt not likely to be repaid and then sold the debt on as prime safe debt creating untold damage Then he presents the waves of change that are coming the challenges of new technologies the business opportunities opened by reactions to climate change and demographic changes as workers and managers are no longer predominantly baby boomers He also warns of future signs of impending financial setbacks that should be avoided A financial crisis will occur only when the fuel is there in the form of an investment bubble In his previous book *Compliance and Regulation in the Financial Services Industry* Patrick Callioni successfully predicted most of the course of the current economic downturn Over regulation is as dangerous as under regulation so he proposes the creation of a federated network of trust Throughout this exciting book he emphasizes the increasing importance of knowledge capital value that is not

captured by existing accounting standards and in particular soft intangibles knowledge assets time assets motivational assets etc and he proposes guidance on their measurement and profitable management      **Timescale** Nigel Calder,1984      **Mind Over Mind** Morton Klass,2003 Mind Over Mind explores the phenomenon of spirit possession from both anthropological and psychological perspectives Spirit possession is ritually important in many cultures from India to Brazil to Madagascar but has tended to be narrowly regarded from modern American and European perspectives as a psychopathological problem of multiple personality disorder This book proposes an integration of anthropological and psychological approaches concluding with a new analytical framework for understanding spirit possession and resolving the controversy surrounding the reality of possession The issues raised are thus essential to both the anthropology of religion and the psychology of altered states of consciousness At the same time Mind over Mind confronts the most challenging philosophical issues of human consciousness and human identity which can not be properly formulated without the insights of social and cultural anthropology At the most general level this study argues for the unequivocal importance of an interdisciplinary approach to spirit possession and for the integral significance of anthropology for the other human sciences      *Bound to be Free* Jan Fortune-Wood,2001 In a radical rethinking of compulsory education this book written by a proud parent and home educator of four explodes the myth that state education is free education arguing that institutional education not only bears a significant financial cost but is detrimental to the freedom and autonomy of children parents or members of society alike The author proposes that home education is a salient positive and critical alternative to paying the costs of institutional education as it promotes autonomy and freedom in education as well as in life      *Scientific American* ,2005      **Unorthodox Views** James L. Battersby,2002-03-30 Much of contemporary critical theory holds that meaning is relative and subjective This book scrutinizes the principal assumptions and beliefs about mind language meaning truth and reality governing current debate and discussion not only in literary criticism and theory but also in the broader academic culture In doing so the volume brings support to the growing number of scholars who are expressing renewed interest in authors determinate meanings formal and aesthetic issues and related concerns but who have been laboring without sufficient theoretical arguments or justifications Moving beyond critique the book offers rigorous defenses of alternatives to the prevailing critical orthodoxies The first five chapters address foundational issues arguing against or exposing the limitations of the most common forms of linguistic idealism social constructivism and relativism These initial chapters prepare the way for subsequent discussions of more text based matters such as the authorial determination of artistic effects the bases of our emotional and evaluative responses to fiction the justifications of our decisions about intrinsic merit and artistic value and other matters crucial to our understanding of the meanings and values implicit in human expression      *Actes* ,1998      **Icons of Unbelief** S. T. Joshi,2008-10-30 Discusses the ideas and impact of 27 atheists agnostics and secularists whose ideas have shaped society over the last 200 years In the opinion of many critics and philosophers we are entering an age of atheism marked by the

waning of Christian fundamentalism and the flourishing of secular thought Through alphabetically arranged entries written by expert contributors this book profiles 27 iconic figures of unbelief whose ideas have shaped American society over the last 200 years Included are entries on influential figures of the past such as Albert Einstein and Voltaire as well as on such contemporary figures as Richard Dawkins and Sam Harris Each entry discusses the ideas and lasting significance of each person or group provides sidebars of interesting information and illuminating quotations and cites works for further reading The volume closes with a selected general bibliography Students in social studies and history classes will welcome this reference as a guide to the ideas central to the American separation of Church and State and to many of the political debates at the heart of society today Each entry discusses the ideas and lasting significance of the person or group provides sidebars of interesting information and quotations and closes with a list of works for further reading The volume ends with a selected general bibliography Students in history and social studies classes will welcome this reference as a guide to the American separation of Church and State and to the ideas central to contemporary political debates *Harvard Political Review*, 2000

*The Future of Atheism* Alister E. McGrath, Daniel Clement Dennett, 2008 This frank and fair exchange between two leading thinkers Alistair McGrath and Daniel Dennett sets the whole debate about atheism in context
