Arroyo Acevedo, 2025-09-17 The promotion of health in universities is of great importance as it allows for the encouragement of healthy lifestyles and the prevention of diseases among students teaching staff and administrative personnel. The university is a conductive environment for the promotion of healthy habits since firstly it is usually the moment when the students make decisions under their responsibility and secondly it is a place where academic sports and social activities take place so it is also an ideal moment to promote changes that can be transferred to society and the rest of the individual's life.
