INTRODUCTION Economics is the social science that analyzes the production distribution and consumption of goods and services Political economy was the earlier name for the subject but economists in the late 19th century suggested economics as a shorter term for economic science that also avoided a narrow political interest connotation and as similar in form to mathematics ethics and so forth Everyone is a part of economy and everyone uses the rules of economy too From the time we are born we become consumers of various products and services say medical services baby foods and so on We grow and diversify to attain various different roles as producers traders mediators and agents Today s world is that of economic imperialism where economical factors most importantly money dictates all the elements of the society not to forget close family relations With recession wreaking havoc economics is something which even ignorant households are learning Economics is a science which deals with production distribution and consumption of goods and services Therefore we can conclude that whatever involves transfer of money includes economics There are two schools of economics namely microeconomics and macroeconomics The combined results of these two determine the actual effect of economics on people To list all the important functions of economics would be literary impossible as newer issues keep creeping up In the following lines we have described some broad and basic functions of economics **The English Catalogue of Books ...**,1906 **Teacher Education (Research Based)** Dr Hiralkumar Barot,Dr Raju L Pargi,2017-04-08 Today the environment degradation is a matter of agent concern before human society Both developing as well as developed countries are facing severe environmental problems In the developmental process man has been ruthlessly extracting natural resources and polluting natural environment Various environmental problems pose a threat to environmental sustainability among which the increasing level of wastes and air pollution destruction of ozone hole acid rain global warming etc are same of the common issues The earth is fast losing its treasure Baliga 1996 **Gujarat Under Modi** Christophe Jaffrelot,2024-02-29 In 2012 Narendra Modi became the first Hindu nationalist politician thrice elected to lead a state of the Indian Union his stewardship as Chief Minister of Gujarat being the longest in that state s history Modi and his BJP supporters explained his achievement by pointing to economic growth under his leadership yet detractors point out that Modi has been more business friendly than market friendly to the benefit of large industrial corporations and at the cost of great social polarisation In 2002

an anti Muslim pogrom of unparalleled ferocity occurred in Gujarat leading to the biggest number of Muslim deaths since Partition The state s Hindu majority immediately rallied around Modi No serious riot has occurred in Gujarat since but polarisation was key to Modi s strategy there and he has deployed that strategy again and again since he became Prime Minister of India in 2014 For Modi has cultivated a communal image A marketing genius his messaging combines the politics of Hindutva with economic modernisation to the clear appreciation of Gujarat s middle class Christophe Jaffrelot s revealing book shows how Modi s Gujarat served as the laboratory of Modi s India not only in terms of Hindu majoritarianism and national populism but also of caste and class politics
