Challenges and Opportunities of Open Educational Resources Management Thanuskodi, S.,2020-06-26 Education is a fundamental human right yet much of the world's population lives with poor literacy. Due to rapidly growing technology and internet usage, open educational resources (OER) are increasingly being used to help transcend barriers to literacy while also aiding in educational attainment. With tremendous developments in ICTs, the education system of today has been enriched by various OERs. The optimal utilization of opportunities provided by the technological developments presents a profound challenge for education systems and has serious implications involving cost, access, equity, pedagogy, and quality. Challenges and Opportunities of Open Educational Resources Management is an essential research publication that explores access to information and societal and economic hurdles that contribute to informational inaccessibility. Highlighting topics such as resources, digital libraries, and information management, this book is ideal for librarians, academicians, computer scientists, researchers, policymakers, and students. Moreover, the book will provide insights and support executives concerned with the management of expertise, knowledge, information, and organizational development in different types of work communities and environments.

THE SECOND REPORT ON THE STATE OF THE WORLD'S ANIMAL GENETIC RESOURCES FOR FOOD AND AGRICULTURE Food and Agriculture Organization of the United Nations,2018-06-06 Animal genetic resource diversity underpins the supply of livestock products and services across a wide range of production environments. It promotes resilience and serves as a basis for adapting livestock management to changing conditions. It is vital to the livelihoods of many of the world's poor people. It can contribute to the delivery of ecosystem services such as landscape management and the maintenance of wildlife habitats. However, it is often undervalued, underused, and under threat. This report updates the global assessment provided in the first report on The State of the World's Animal Genetic Resources for Food and Agriculture published in 2007. It focuses particularly on changes that have occurred during the period since the first report was published. It serves as a basis for a review and potential update of the Global Plan of Action for Animal Genetic Resources, which since 2007 has provided an agreed international framework for the management of livestock biodiversity. Drawing on 129 country reports, it presents an analysis of the state of livestock diversity, the influence of livestock sector trends on the management of animal genetic resources, the state of capacity to manage animal genetic resources, including legal and policy frameworks, and the state of the art in tools and methods for characterization, valuation, use, development, and conservation.
