**Rethinking Music through Science and Technology Studies** Antoine Hennion, Christophe Levaux, 2021-05-03 This volume seeks to offer a new approach to the study of music through the lens of recent works in science and technology studies STS which propose that facts are neither absolute truths nor completely relative but emerge from an intensely collective process of construction Applied to the study of music this approach enables us to reconcile the human social factual and technological aspects of the musical world and opens the prospect of new areas of inquiry in musicology and sound studies *Rethinking Music through Science and Technology Studies* draws together a wide range of both leading and emerging scholars to offer a critical survey of STS applications to music studies considering topics ranging from classical music instrument making to the ethos of DIY in punk music The book's four sections focus on key areas of music study that are impacted by STS organology sound studies music history and epistemology Raising crucial methodological and epistemological questions about the study of music this book will be relevant to scholars studying the interactions between music culture and technology from many disciplinary perspectives

*Popular Music in a Digital Music Economy* Tim Anderson, 2013-12-17 In the late 1990s the MP3 became the de facto standard for digital audio files and the networked computer began to claim a significant place in the lives of more and more listeners The dovetailing of these two circumstances is the basis of a new mode of musical production and distribution where new practices emerge This book is not a definitive statement about what the new music industry is Rather it is devoted to what this new industry is becoming by examining these practices as experiments dedicated to negotiating what is replacing an object based industry oriented around the production and exchange of physical recordings In this new economy constant attention is paid to the production and licensing of intellectual property and the rise of the social musician who has been encouraged to become more entrepreneurial Finally every element of the industry now must consider a new type of audience the end user and their productive and distributive capacities around which services and musicians must orient their practices and investments

**Managing a media company in the “digital age”. The effects of Web 2.0 and social media on music industry** Sascha Gnoss, 2014-09-18

Studienarbeit aus dem Jahr 2014 im Fachbereich Medien Kommunikation Multimedia Internet neue Technologien Note 1 3 Rheinische Fachhochschule K In Veranstaltung International Marketing and Media Management Sprache Deutsch Abstract

The music industry is in the midst of change. This change has been triggered by the influence of new media such as the Internet or mobile telephones which contribute to an increasing digitalisation of society during the last years. The results of the growing digitalisation are changes in the consumer behaviour, new devices and also new sales channels. Supply and demand of music products is greater today than ever before; however, the music industry generates only little capital because of illegal downloads and small revenues of the digital music market. Thurner 2010 pp 5. In the course of the digitalisation, new media plays a big role. Like Peter R. Scott and Mike Jacka put it, social media is the set of Web-based broadcast technologies that enable the democratization of content, giving people the ability to emerge from consumer of content to publishers. Scott and Jacka 2011 pp 5. Due to social media, people have the opportunity to communicate with people all over the world to share pictures, videos and audio files. Safko and Brake 2009 pp 6. Interesting songs or videos are going to spread rapidly from YouTube within social networks like Facebook and Twitter. Therefore, unknown artists can become stars overnight. Urbanowicz 2013. The digitalisation and social media have changed the framework of the music industry and because of that, the management topics of the music companies changed as well. This assignment identifies and discusses the management topics a company has to deal with in the music industry in the digital age. In chapter one, the author explains the new framework of the web 2.0 and therefore the changing consumption habits of the consumer. Also, the paper identifies the changes of the consumption of music by social media. In chapter two, in the scope of this assignment, old and new communication models will be presented and analysed. Also, the important management topics will be explained and further the effect on the music industry will be established. For exemplification of both subjects, the author makes use of the company Pandora Internet Radio. Hastings Communications and Entertainment Law Journal (Comm/Ent), 2016. Spotify For Dummies. Kim Gilmour, 2011-10-19. The ultimate beginner guide to the groundbreaking music service Spotify.
