Ludicrous Edward Niedermeyer,2019-08-20 Tesla is the most exciting car company in a generation but can it live up to the hype Tesla Motors and CEO Elon Musk have become household names shaking up the staid auto industry by creating a set of innovative electric vehicles that have wowed the marketplace and defied conventional wisdom The company s market valuation now rivals that of long established automakers and to many industry observers Tesla is defining the future of the industry But behind the hype Tesla has some serious deficiencies that

raise questions about its sky high valuation and even its ultimate survival Tesla's commitment to innovation has led it to reject the careful zero defects approach of other car manufacturers even as it struggles to mass produce cars reliably and with minimal defects While most car manufacturers struggle with the razor thin margins of mid priced sedans Tesla's strategy requires that the Model 3 finally bring it to profitability even as the high priced Roadster and Model S both lost money And Tesla's approach of continually focusing on the future even as commitments and deadlines are repeatedly missed may ultimately test the patience of all but its most devoted fans In Ludicrous journalist and auto industry analyst Edward Niedermeyer lays bare the disconnect between the popular perception of Tesla and the day to day realities of the company and the cars it produces Blending original reporting and never before published insider accounts with savvy industry analysis Niedermeyer tells the story of Tesla as it's never been told before with clear eyes objectivity and insight Hubris Maximus Faiz Siddiqui, 2025-04-22 The rise fall and revival of the Caesar of Silicon Valley Elon Musk has cast himself as the savior of humanity an altruistic force whose fortune is tied to noble pursuits from halting our dependence on fossil fuels to colonizing Mars Once frequently heralded as a modern day Edison Musk has taken up a new place in the public consciousness with his growing desire to disrupt not just the automotive and space industries but the policies that shape our nation placing him at the center of America's most complex undertakings in manufacturing politics and defense and technology even as his increasingly erratic personal behavior has raised questions about his stability and judgement Musk famously leads his companies from a bully pulpit eroding guardrails and cutting through red tape whenever possible with little regard for the fallout as long as it serves his larger goals Many in his orbit have seen their lives upended or their careers throttled by believing in his utopian vision As the scale of the wagers he makes with his fortune and concerns about his credibility have grown in recent years he alternately seems to be in complete command or on the verge of a meltdown Yet in the long run he has only become wealthier and now the stakes have risen Thanks to astute political maneuvering Musk is no longer limited to gambling with a company's bottom line or the livelihoods of his workers he is poised to apply his uncompromising approach to business to the foundational rules and regulations that hold our society together At a moment when America's tech gods are more influential than ever Hubris Maximus is a cautionary tale about the pitfalls of lionizing magnetic leaders Washington Post journalist Faiz Siddiqui offers a gripping detailed portrait of a singularly messy and lucrative period in Musk's career as well as a case study in the power of using one's platform to shape the public narrative in a world that can't turn away from its screens *The Electrical Review*, 1888 *The Telegraphic Journal and Electrical Review*, 1888 **The Electrical World**, 1892 **International Magnetics Conference '84** Gerhard Winkler, Peter Hansen, 1984 **Transactions** American Institute of Electrical Engineers, 1891 List of members in v 7 15 17 19 20 **Western Electrician**, 1893 Journal of the Physical Society of Japan Nihon Butsuri Gakkai, 2010 The Review of Reviews, 1895 **The Electrical Engineer**, 1888 **Research & Development**, 2007-05 *Electrical Engineer*, 1890 *The Model*
