Kuether, Paolo Tiso, 2025-08-07 Nonlinear Structures Systems Volume 1 Proceedings of the 41st IMAC A Conference and Exposition on Structural Dynamics 2023 the first volume of ten from the Conference brings together contributions to this important area of research and engineering The collection presents early findings and case studies on fundamental and applied aspects of Nonlinear Dynamics including papers on Experimental Nonlinear Dynamics Jointed Structures Identification Mechanics Dynamics Nonlinear Damping Nonlinear Modeling and Simulation Nonlinear Reduced Order Modeling Nonlinearity and System Identification

[Artificial Intelligence for DevOps and Site Reliability Engineering: Theories, Applications, and Future Directions](#) Swarup Panda, 2025-08-07 This book offers an in depth examination of the transformative impact Artificial Intelligence AI and Machine Learning ML have on DevOps and Site Reliability Engineering SRE It sits at the intersection of the cutting edge in AI and at how actual operations can use smart technology to refine your CI CD pipeline tell when incidents are rolling your way help to automate resolution and improve the eyes on monitoring Readers will learn complete details on AI driven observability finding anomalies performance tuning and capacity planning helping organizations to predict failures improve up times and accelerate software with a rock solid foundation With clear and detailed explanations bolstered by case

studies with leaders from the industry and actionable frameworks to implementation DevOps engineers SRE professionals and IT executives will learn how to effectively operationalize AI within their environments It also includes critical content on AI ethics transparency and governance a must for today s high stakes production environments Readers will walk away fully prepared to use AI to automate the repetitive and time consuming tasks based on data and to make data informed decisions that strengthen their infrastructure and deliver operational excellence [Machine Learning](#) Sergios Theodoridis,2025-03-01

Machine Learning From the Classics to Deep Networks Transformers and Diffusion Models Third Edition starts with the basics including least squares regression and maximum likelihood methods Bayesian decision theory logistic regression and decision trees It then progresses to more recent techniques covering sparse modelling methods learning in reproducing kernel Hilbert spaces and support vector machines Bayesian learning is treated in detail with emphasis on the EM algorithm and its approximate variational versions with a focus on mixture modelling regression and classification Nonparametric Bayesian learning including Gaussian Chinese restaurant and Indian buffet processes are also presented Monte Carlo methods particle filtering probabilistic graphical models with emphasis on Bayesian networks and hidden Markov models are treated in detail Dimensionality reduction and latent variables modelling are considered in depth Neural networks and deep learning are thoroughly presented starting from the perceptron rule and multilayer perceptrons and moving on to convolutional and recurrent neural networks adversarial learning capsule networks deep belief networks GANs and VAEs The book also covers the fundamentals on statistical parameter estimation and optimization algorithms Focusing on the physical reasoning behind the mathematics without sacrificing rigor all methods and techniques are explained in depth supported by examples and problems providing an invaluable resource to the student and researcher for understanding and applying machine learning concepts New to this edition The new material includes an extended coverage of attention transformers large language models self supervised learning and diffusion models Provides a number of case studies and applications on a variety of topics such as target localization channel equalization image denoising audio characterization text authorship identification visual tracking change point detection hyperspectral image unmixing fMRI data analysis machine translation and text to image generation Most chapters include a number of computer exercises in both MatLab and Python and the chapters dedicated to deep learning include exercises in PyTorch New to this edition The new material includes an extended coverage of attention transformers large language models self supervised learning and diffusion models
