Professional Nursing *[Chapter 1: Handling Textbook]* - Answer As a nurse, you (1) offer skilled care to those recovering from illness or injury, (2) advocate for patients' rights, (3) teach patients to manage their health, (4) support patients and their caregivers at critical times, and (5) help them navigate the complex health care system.

Definition of Nursing - Answer Nursing is described as both an art and a science; a heart and a mind.

- Nursing is putting the patient in the best condition for nature to act (Florence Nightingale).
- The nurse's unique function is to aid patients, sick or well, in performing those activities contributing to health or its recovery (or to peaceful death) that they would perform unaided if they had the necessary strength, will, or knowledge—and to do this in such a way as to help them gain independence (Henderson).
- *Nursing is the protection, promotion, and optimization of health and abilities, prevention of illness and injury, alleviation of suffering through the diagnosis and treatment of human response, and advocacy in the care of individuals, families, communities, and populations (American Nursing Association).*

Nursing's View of Humanity (7 Dimensions of Wellness) - Answer 7 Dimensions of Wellness that contribute to health and quality of life:
