**Medicine Meets Virtual Reality 19** Li Felländer-Tsai, Randy S. Haluck, Richard A. Robb, Steven Senger, Kirby G. Vosburgh, 2012-02-15 A physician who is treating a patient confronts a complex and incompletely understood living system that is sensitive to pain. An engineer or programmer who develops a new device on the other hand operates within the less emotional domains of materials and mathematics. The Medicine Meets Virtual Reality MMVR conference brings together physicians, scientists, engineers, educators, students, and others to bridge the gap between clinicians and technologists and to create collaborative solutions to healthcare challenges. This book presents the proceedings of the Medicine Meets Virtual Reality conference MMVR19 held in Newport Beach, California, USA, in February 2012. It includes papers on modeling and simulation, imaging, data visualization, and fusion, haptics, robotics, telemedicine, and medical intelligence, networking, virtual and augmented reality, psychotherapy, and physical rehabilitation tools, serious games, and other topics. MMVR stimulates interaction between developers and end users and promotes unorthodox problem solving as a complement to rigorous scientific methodology. This book will interest all who are involved with the future of medicine. Medicine Meets Virtual Reality 17 James D. Westwood, 2009. The 17th annual Medicine Meets Virtual Reality MMVR17 was held January 19-22, 2009, in Long Beach, CA, USA. The conference is well established as a forum for emerging data-centered technologies for medical care and education. This proceedings volume is of interest to physicians, surgeons, and other medical professionals.

**Health Informatics** Anthony Maeder, Fernando J. Martin-Sanchez, 2012. A more trusted environment for the management and use of health information would undoubtedly help to consolidate and accelerate the use of health informatics solutions as change mechanisms to drive the establishment and adoption of new models of care, as well as new technology-oriented healthcare processes. This book presents 35 papers from the Australian National Health Informatics Conference HIC 2012 held in Sydney, Australia, in July and August 2012. The theme of the conference is eHealth Informatics: Building a Healthcare Future Through Trusted Information, and emphasizes the importance of assuring the integrity and security of health data and communications. The papers range from deeply theoretical to intensely practical and address many elements of contemporary health informatics research endeavors, as well as peripheral but related topics. Australian research developments and implementations are at the forefront of eHealth and are the focus of much international attention. The Federal Government has invested in the building of a National Broadband Network, leading implementation sites, telehealth delivery, and personally controlled electronic health records (PCEHR) launched 30 days before the conference. This book will be of interest to clinicians, researchers, industry innovators, and all those who share the desire to deliver better healthcare to all.
