**Norway's**

**Pharmaceutical Revolution** Knut Sogner,2022-08-18 The pharmaceutical revolution that gathered pace in the 1930s delivered a plethora of almost magical new drugs such as penicillin streptomycin cortisone and the birth control pill This revolution grew from academic business relationships in five countries USA Germany Great Britain Switzerland and France Many other countries tried and failed to replicate this success yet a handful of Scandinavia companies made important breakthroughs in a narrow band of specialities This is the story of how one Norwegian company Nyegaard Co achieved international success from the 1970s onwards with a breakthrough product facilitating X ray pictures of the soft tissues of the body The company succeeded by harnessing research skills and creating scientific and business alliances abroad building its own momentum step by step the corporation as entrepreneur It thereby broke with the conventional way a national medical ecosystem facilitated the crucial scientific progress This is a story both of personal initiatives and great organizational transformations in several stages In the 1950s Nyegaard Co was a small hierarchical home market oriented generics company By the end of the 1990s it had developed into a fairly large and multinational hierarchical company preoccupied as much with shareholder value as scientific progress It has also become a company that no longer had the same ability to innovate as before and therefore became merged into another one

*Life After Privatization* Raj S. Chari,2015 Life

After Privatization offers a refreshing and original theoretical conceptualization of what happened to stateowned enterprises after they were privatized from the late 1970s onwards Some privatized firms have become today s European and global giants Alphas merging with or acquiring other firms whereas other firms Betas have been taken over by Alphas or other sectoral leaders The book raises questions such as which privatized firms in the airline automobile and the electricity sectors in the UK France Germany Italy and Spain are Alphas and Betas today And why Building on a variety of themes from both Political Science and Business Studies it considers a comprehensive set of explanations both internal and external to the firm to analyse why a firm may become an Alpha or a Beta The evidence shows that while internal factors are important the more external political factors are necessary and sufficient to explain why a firm becomes an Alpha or a Beta This includes the impact of liberalization the roles of states and the actions of regulators that are lobbied by firms Based on exhaustive evidence Life After Privatization concludes with a novel inductive theory which offers a significant step forward for social science scholars and practitioners understanding of the politics businesses face in global markets
