Meisen Kimono Karun Thakar Collection:

Kimono Meisen Karun Thakar, Anna Jackson, 2015 Meisen silk was produced in Japan from the late nineteenth century and became particularly popular between 1910 and 1940. Meisen was an innovative, quick and cost effective dye and weaving method with the effect of labor intensive and multicolored traditional kasuri ikat fabric. The meisen kimonos that were produced en masse were the first affordable ready to wear kimonos. Designed by a young generation of Japanese textile designers who synthesized classic Japanese design with the influence of Western design movements, the patterns still look fresh and original today and represent a little known study in textile design of the early twentieth century. As eminent fashion garments, meisen kimonos would be replaced with the next new fashion after just a season or two. Thus many of them were stored in excellent condition and were even passed down as heirlooms. In recent years they have resurfaced and are now enjoying the high esteem bestowed on them by collectors. Kimono Style: Edo Traditions to Modern Design Monika Bincsik, Karen Van Godtsenhoven, Arai Masanao, 2022-06-04. Japan's engagement with Western clothing culture and art in the mid nineteenth century transformed the traditional kimono and began a cross cultural sartorial dialogue that continues to this day. This publication explores the kimono's fascinating modern history and its notable influence on Western fashion. Initially signaling the wearer's social position, marital status, age and wealth, older kimono designs gave way to the demands of modernized and democratized twentieth century lifestyles as well as the preferences of the emancipated new woman. Conversely, inspiration from the kimono's silhouette liberated Western designers such as Paul Poiret and Madeline Vionnet from traditional European tailoring. Juxtaposing never before published Japanese textiles from the John C. Weber Collection with Western couture, this book places the kimono on the stage of global fashion history.
