Memo 2014 Geography Paper 2 Grade 1:

Asymmetric Crisis in Europe and Possible Futures Johannes Jäger, Elisabeth Springler, 2015-04-10 The crisis in Europe is often discussed as a crisis of European integration or a crisis of national economies within Europe. Both the methodological Europeanism and methodological nationalism miss out the important links between economic and political processes at different spatial scales within Europe and therefore asymmetries and phenomena of uneven development. In addition a discussion of possible scenarios which systematically addresses the implications of anti crisis policies is missing. This volume seeks to close this gap by systematically integrating the analysis of economic policy or technical solutions to the crisis within a broader framework of political economy. It argues that combining critical political economy approaches and post Keynesian perspectives allows for a systematic understanding of the economic and political dimensions of the crisis. Although both approaches have the capacity to deal with asymmetries and uneven development the heterogeneity in Europe has been an often largely neglected dimension of analysis. However this recent crisis has shown that this is an essential dimension which has to be addressed in order to better understand the dynamics of European development and integration. Hence this book aims to deal with asymmetries in Europe and to bridge the gap between the two perspectives. This work will initiate an integrative debate that is crucial for a deeper understanding of the current crisis and is an important resource for all students and scholars of IPE European political economy and European politics.

Taken for a Ride Matteo Rizzo, 2017 How does public transport work in an African city under neoliberalism? Who owns what in it? Who has the power to influence its shape and changes in it over time? What does it mean to be a precarious and informal worker in the private minibuses that provide public transport in Dar es Salaam? These are the main questions that inform this in depth case study of Dar es Salaam's public transport system over more than forty years. The growth of cities and informal economies are two central manifestations of globalization in the developing world. Taken for a Ride addresses both drawing on long term fieldwork in Dar es Salaam, Tanzania and charting its public transport system's journey from public to private provision. This new addition to the Critical Frontiers of Theory Research and Practice in International Development Studies series investigates this shift alongside the increasing deregulation of the sector and the resulting chaotic modality of public transport. It reviews state attempts to regain control over public transport and documents how informal wage relations prevailed in the sector. The changing political attitude of workers towards employers and the state is investigated from an initial incapacity to respond to exploitation to the political organisation and unionisation which won workers concessions on labour rights. A longitudinal study of workers throws light on patterns of occupational mobility in the sector. The book ends with an analysis of the political and economic interests that shaped the introduction of Bus Rapid Transit in Dar es Salaam and local resistance to it. Taken for a Ride is an interdisciplinary political economy of public transport exposing the limitations of market fundamentalist and postcolonial approaches to the study of economic informality, the urban experience in developing countries and their failure.
