developed an increasing interest in science of all kinds Whilst poets and novelists took inspiration from technical and scientific innovations those directly engaged in these new disciplines relied on literary techniques to communicate their discoveries to a wider audience The essays in this collection uncover this symbiotic relationship between literature and science at the same time bridging the disciplinary gulf between the history of science and literary studies Specific case studies include the engineering language used by Isambard Kingdom Brunel the role of physiology in the development of the sensation novel and how mass communication made people lonely *Victorian Periodicals Newsletter*,2001 Decoding Distraction Joan Kuulei Menefee,2005 *The Physiology of the Novel* Nicholas Dames,2007-09-27 How did the Victorians read novels Nicholas Dames answers that deceptively simple question by revealing a now forgotten range of nineteenth century theories of the novel a range based in a study of human physiology during the act of reading He demonstrates the ways in which the Victorians thought they read and uncovers surprising responses to the question of what might have transpired in the minds and bodies of readers of Victorian fiction His detailed studies of novelcritics who were also interested in neurological science combined with readings of novels by Thackeray Eliot Meredith and Gissing propose a vision of the Victorian novel reader as far from the quietly immersed being we now imagine as instead a reader whose nervous system was addressed attacked andsoothed by authors newly aware of the neural operations of their public Rich in unexpected intersections from the British response to Wagnerian opera to the birth of speed reading in the late nineteenth century The Physiology of the Novel challenges our assumptions about what novel reading once did and still does to the individual reader and provides new answers to the question of how novels influenced a culture s way of reading responding and feeling
