## **Operative Dictations In General And Vascular Surgery Operative Dictations Made Simple:**

Operative Dictations in General and Vascular Surgery Jamal J. Hoballah, Carol E. H. Scott-Conner, Hui Sen Chong, 2017-07-07 This text is a fully updated and revised third edition of a highly successful text. The format of this text is unique and has been very successful. A total of 286 short chapters organized into 24 Sections provide operative dictation templates for all of the common and the vast majority of the uncommon and even rare operations performed by general and vascular surgeons. Each chapter also provides a succinct synopsis of the operation through bullet ed lists which include Indications, Essential Steps, Note these Variations and Complications. The book thus serves two purposes: these operative dictation templates can be used verbatim when dictating the operative note for a procedure and the book provides ready reference to the trainee going into the operating room to do the procedure for the first time or to someone preparing for their Board examinations. Space for notes allows surgeons to personalize the book and turn it into a resource unique to their situation. Fully updated and expanded Operative Dictations in General and Vascular Surgery Third Edition includes significant additions that include flexible endoscopic procedures now recognized as a core part of general surgery training and practice, single incision laparoscopic cholecystectomy and robotic approaches to the rectum. The endovascular procedures have been significantly expanded as have the approaches to venous disease and to A V fistula creation. Operative Dictations in General and Vascular Surgery Third Edition is intended for practicing surgeons who may modify each template to reflect their own individual practice. It also serves as a concise reminder of essential steps in those operations that may be only rarely performed.

**Operative Dictations in General and Vascular Surgery** Jamal J. Hoballah, Carol E. H. Scott-Conner, MD, 2011-10-09 Operative Dictations in General and Vascular Surgery Second Edition is intended to teach residents the principles of succinct and precise operative dictations for a wide spectrum of surgical procedures. Designed as a portable resource, the book provides typical dictations to guide the resident. Comprised of 226 procedures, this new edition comprises the majority of procedures commonly performed by general and vascular surgeons. For each procedure, a list of common indications is given. This list covers 95% of the situations in which a particular procedure will be used. A list of essential steps follows. These can be used to mentally rehearse the procedure before it is performed. The next heading, Note, these technical variations introduces a list that is intended to prompt the surgeon for particular things to note and dictate within the template. A list of possible complications that are typically associated with that particular surgical procedure follows. Finally, a template operative dictation is provided. Common opening and terminating sequences, for example, how to enter and close the abdomen in all laparotomy dictations are included. The volume has two primary objectives. First, it is designed to serve as a source of model operative dictations that may be individualized and used as templates. Second, it is intended as an aide memoir giving the surgeon a short list of pertinent information about each procedure. Ample space is provided to allow each surgeon to add notes. By reviewing this introductory material before scrubbing on a procedure, the

trainee surgeon will enter the operating room better prepared to participate actively and to learn as much as possible At the end of training this book with the notes accumulated by the resident will serve as an invaluable review resource analogous to the individualized notebooks many surgeons keep
