Pediatric Surgery Christopher P. Coppola, Alfred P. Kennedy, Jr., Ronald J. Scorpio, 2014-05-30 Just as children are not little adults the discipline of paediatric surgery is not equivalent to surgery for adults Differences in anatomy diseases affecting children and the appropriate therapies make the surgical care of children confusing and tense Even within paediatric care the extensive changes children undergo as they develop from neonates to adolescents causes different care to be required at different stages Full size texts are available for comprehensive review of paediatric surgery when one has the luxury to sit and study at a desk but no pocket sized guide specific to paediatric surgery is available This book will fulfil the need for rapid clear concise guidance in the immediate bedside evaluation and treatment of children suffering surgical disease It will provide assistance to surgical and paediatric providers alike anyone who has a hand in the urgent care of children requiring a surgeon The book is also a convenient focused board review guide for trainees and active practitioners

P. Rickham,2011-11-20 At first sight it may appear strange that a volume of Progress in Pediatric Surgery should be devoted to the history of our specialty One assumes that progress is concerned primarily with recent developments whilst history deals with matters of the past However in the past there has also been considerable progress in the development of our understanding of paediatric surgical problems otherwise we would not have progressed to our present achievements The editors therefore do not apologize for compiling this volume but on the contrary feel that the publication of this volume is most timely Modern paediatric surgery has now been practised for three generations The handful of pioneers who were the founders of our specialty worked mainly before the last world war A few dozen of the intermediary generation started work immediately after the war while the new generation who are now dominating our specialty must be counted in thousands Two factors have radically altered paediatric surgery as practised by the intermediary and the present generation of surgeons
