Powell,2012-01-12 Animals that must hunt and kill for at least part of their living are inherently interesting to many people  
and the role that carnivores play in biological communities attract interest from ecologists and conservation biologists  
Conflicts with human activities stimulate continual debates about the management of carnivore populations and throughout  
the world people seek workable solutions for human carnivore coexistence This concise yet authoritative handbook describes  
research methods and techniques for the study and conservation of all terrestrial carnivore species Particular attention is  
paid to techniques for managing the human carnivore interface Descriptions of the latest methodologies are supported by  
references to case studies whilst dedicated boxes are used to illustrate how a technique is applied to a specific land cover  
type species or particular socio economic context The book describes the most recent advances in modelling the patterns of  
animal distributions movements and use of land cover types as well as including the most efficient methods to trap handle  
and mark carnivores Carnivores are biogeographically diverse and whilst extensive scientific research has investigated many  
aspects of carnivore biology not all species have been equally covered This book is unique in its intention to provide practical  
guidance for carrying out research and conservation of carnivores across all species and areas of the world      **Field &**
