Impacting Society Positively Through Technology in Accounting and Business Processes Tankiso Moloi, 2025-05-09 This conference volume discusses the findings of the iCAB 2024 conference that took place in Sun City South Africa on June 27-28, 2024. The University of Johannesburg hosted the iCAB 2024 conference with the aim to bring together researchers from different Accounting and Business Management fields to share ideas and discuss how new disruptive technological developments are impacting the field of accounting. The conference was sponsored by the Association of International Certified Professional Accountants (AICPA/CIMA). **Handbook of Research on Challenges for Human Resource**

**Management in the COVID-19 Era** Figueiredo, Paula Cristina Nunes, Tomé, Eduardo Luís de Campos Soares, Rouco, José Carlos Dias, 2022-06-10 The importance of people in organizations has been growing in the organizational environment over the last decades. Digital transformation, artificial intelligence, and sustainability have already reinforced the role of people as a differentiating element for the success and survival of organizations. These phenomena alone are already challenging for people. There is a consensus that the world of work as we knew before the pandemic will not return. Human resource management (HRM) practices must prepare organizations for the future of work. The *Handbook of Research on Challenges for Human Resource Management in the COVID-19 Era* analyzes the state of the art of HRM in a digital transformation context and investigates the factors that promote more learning and development dynamics in organizational contexts. It also evaluates the impact of HRM policies on individuals, organizations, and societies. Covering topics such as corporate social responsibility, job satisfaction, and electronic performance monitoring, this major reference work is a crucial resource for leaders from public and private companies, human resource professionals, specialists, students, and educators of higher education, researchers, and academicians. *Pandemic Response: Challenges, Advances, and Lessons Learnt* Brent M. Egan, Eva Lee, Duane Caneva, 2025-10-30 SARS-CoV-2 has unleashed the pandemic of the century, inflicting over a million deaths in the United States and over six million deaths worldwide since it was first reported in December 2019. COVID-19, the disease caused by SARS-CoV-2, overwhelmed healthcare systems, paralyzed the global economy, set back education, disrupted the supply chain, and traumatized every fiber of critical infrastructure in society. In developing countries, COVID-19 set back decades of progress in fighting hunger, poverty, illiteracy, and childhood health protection via vaccination. Although substantial resources have been invested in pandemic preparedness and response, it is clear that the world was not prepared for COVID-19 as public health leaders ignored warnings and failed to convert their level of preparedness into timely actions for early disease containment and effective mitigation. Nonetheless, this devastating crisis triggered unparalleled and critical scientific advances, including novel diagnostic testing and drug design, advances in clinical treatment, and rapid vaccine development. As we continue to fight the virus variants, work to reduce the burden of illness, and curb transmission globally to end the pandemic, we must understand and investigate the challenges, advances, and lessons learned in order to better prepare and

protect humanity against the next pandemic While countries have varied significantly in their available resources and application of public health measures to combat the spread of the virus this pandemic clearly shows that a country's wealth does not necessarily secure the health of its citizens A successful pandemic response demands decisive leadership and look ahead system competence The pandemic crisis calls for a reassessment that leads to innovation in public health disaster medicine This presents a clear opportunity for building a resilient society and infrastructure by drawing from successful actions and lessons learned from every part of the world The number of infectious disease outbreaks has been accelerating many of which have pandemic potential These disease outbreaks constitute a major global risk and require coordinated and decisive actions across all countries Public health must seize the moment as the COVID 19 pandemic offers a wealth of lessons for reassessment and innovation to build a better and sustained health security future This research topic seeks original research on topics related to the challenges scientific advances clinical and basic science and lessons learned during the COVID 19 crisis Examples of such topics include Optimizing constrained resources e g redesigning ventilators for multiple patient usage decontaminating N95 masks pooling for tests etc Novel drug and treatment discovery Rapid vaccine design Operations and systems redesign e g contact tracing mass screening and vaccination adapting clinical facilities alternative care delivery and manufacturing bottlenecks Tradeoffs and impact of various public health policies and response actions in mitigating the pandemic We expect authors from the following range but not limited to 1 Scientists and clinicians who succeeded in advancing ventilator usage by making it for multiple people to share one 2 Scientists who have succeeded in decontaminating the N95 so that it can be used for 21 days instead of 1 day 3 Hospital leaders who succeeded in adapting the clinical environment so that it can adapt to the maximum number of patients being agile and being able to protect their workers 4 mRNA technology how it overcomes the time hurdle to roll out at such rapid speed 5 How local strike teams raced through the limited resources and time and managed to vaccinate as many people as possible

Resilient Businesses for Sustainability Rajnish Kumar Misra,Shriram A. Purankar,Divya Goel,Shivani Kapoor,Ridhima B. Sharma,2024-10-02 Today there are many intricate disruptions originating from diverse sources the 2nd volume provides invaluable insights into the role of Human Resource for sustainability and Marketing for building resilient businesses Offering a comprehensive examination of how resilience is harnessed to build businesses capable of withstanding adversity

*Making a Difference* Rebecca Meehan,John Sharp,2023-08-31 Making a Difference Careers in Health Informatics addresses everyday questions from people interested in working in health informatics Typically this includes people who work in health care computer and technology fields information science finance insurance and related areas The book aims to tell students about various jobs that exist in the health informatics field what credentials they need to qualify for those jobs and a brief description about what people in those roles tend to do every day As faculty members teaching in a Master of Science in Health Informatics program the authors say that they are fortunate to have eager bright and talented graduate students who are invested in

related health informatics areas This could be their experiences in medicine nursing clinical care software engineering finance business library science data science or caregiving Common questions we hear from our students that may be similar to questions among readers include what jobs are out there what can I do with this degree or what does a health informatics specialist do This book aims to answer some of these questions with a look into a day in the life of people working in this field The book examines career options roles and skill sets important in health informatics across 6 related industries We want readers to realize that their skills and interests can apply in many areas of the field not exclusively hospitals This book highlights 6 unique work segments hospital systems long term care health IT consumer health organizations government consulting and payer insurance companies into which readers may look to expand their career opportunities The hope is that this book will provide insight into career opportunities students and professionals may be qualified for and interested in but simply not aware of Hiring managers and human resource professionals across the stakeholder groups across the stakeholder groups may also find the book helpful in learning about other roles that may benefit their organizations

**Employee and organizational wellbeing in the new normal: Implications for the post COVID-19 era** Munwar Hussain Pahi, Umair Ahmed , Abdul Halim Abdul Majid, 2023-12-11 BNA's Employee Relations Weekly , 1990 *Critical Infrastructure* Robert Radvanovsky, Allan McDougall, 2023-12-06 *Critical Infrastructure Homeland Security and Emergency Preparedness* Fifth Edition represents a continuation of research and recommendations from the past editions that spans nearly twenty years of focusing on critical infrastructure CI protection Over that time the operating threat and technical environments have changed drastically The doctrines that have guided practitioners across various domains have also evolved due to changing demands This is a natural result when doctrines collide and gradually evolve toward and coalesce into a singular understanding of an issue Those who have practiced in this domain have seen these collisions in the past an example being the convergence of physical security and cyber information and operational technologies security It is with this backdrop and understanding of the domain that the authors not only describe the current state of affairs but also provide a means through which researchers and participants such as practitioners students industry stakeholders owners and operators in various government and private CI sectors can look at trends and changes in the domain that may not be apparent elsewhere The authors identify shifts in today's environment that move the thinking away from simply the robustness of systems to their adaptability and resilience They outline design processes that likewise are evolving away from the simple adoption of best practices to risk based management and even towards structures based on engineering driven principles These changes are not occurring at a unified pace and the differences can result in tensions between certain communities However the debate itself is indicative of the critical thinking that is beginning to take hold within each infrastructure domain *Critical Infrastructure* Fifth Edition continues to critically examine the evolving importance of our critical infrastructure to our society recognizing the underpinning value of cyber technology and how physical infrastructures
