*Operations Management* Steven A. Melnyk, David R. Denzler, 1996-02-01    *Operations Management Study Guide* Steven A. Melnyk, David R. Denzler, Lawrence P. Ettkin, 1996    *MyPOM* David R. Denzler, 2003    Production & Operations Management Upendra Kachru, 2009

This book takes a pedagogical approach that is participative and interactive involving the case study method of learning. Chapters start with an Indian case study of a well known company. This is used as a capstone case for the chapter. The student will find this an easy learning experience as data and additional information for these enterprises is readily available. The selection of such cases makes classroom learning truly suited to the Indian business environment. The value driven approach to Operations Management is used in structuring the text into three modules. The first module discusses the infrastructure function of Operations Management. Infrastructure function is considered to be product process capacity and location. Module Two describes the structure of the operations function. This includes quality and other product transformation processes. Module Three focuses on the organization people and processes i.e. the job, the work and the workplace. In addition most of the mathematical techniques have been separated into supplements attached to the relevant chapters. Software solutions for the techniques have been explained in the text. Every mathematical technique is exemplified with a number of solved problems. Unlike many Production and Operations Management texts this book covers E-commerce, Industrial Safety, Maintenance, Environmental Management, Green Productivity and new technological trends in the discipline. These sections should add to the significance of exploring how firms can gain competitive advantage and promote sustainable development at the same time. The last section of the book comprises of a selection of cases from The Indian Institute of Management at Ahmedabad. The cases encompass the entire spectrum of Indian Industry the private and the public sectors, professional and family managed business organizations, service and manufacturing industries, single industry and conglomerates. The cases relate to Operations Strategy, Supply Chain Management, Capacity Planning, New Products Manufacturing Technologies etc. The Case Studies are of world class. Prof Tirupati one of the authors of the case studies according to Management Science has penned one of the top 100 management articles in the 50 years. The book is comprehensive, lucid and easy to read and understand. It should be of great value both to students and faculty.
