from both academia and industry examines ways in which universities can make effective use of asynchronous collaboration All aspects of academic life are covered from teaching and research through to support and management The Digital University contains a range of material from research oriented chapters through to the experiences of senior university management in attempting to make their institutions as efficient as they need to be to survive in the 21st century *PC Mag* ,1993-06-29 PCMag com is a leading authority on technology delivering Labs based independent reviews of the latest products and services Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology *ACM Transactions on Computer-human Interaction* ,2002 **PC Mag** ,1985-09-03 PCMag com is a leading authority on technology delivering Labs based independent reviews of the latest products and services Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology Anglicko-český slovník ,1994 *Database Systems for Advanced Applications* Arbee L. P. Chen,Frederick H. Lochovsky,1999 These conference papers cover the 6th International Conference on Database Systems for Advanced Applications They examine topics such as the World Wide Web workflow management and specification management visualization and multimedia databases spatial databases and index techniques **Software Process Technology** ,1994 **Proceedings of the Twenty-Second Annual ACM Symposium on Principles of Distributed Computing** ,2003 This paper presents an efficient asynchronous protocol to compute RSA inverses with respect to a public RSA modulus N whose factorization is secret and shared among a group of parties Given two numbers x and e the protocol computes y such that $y \equiv x \pmod{N}$ A synchronous protocol for this task has been presented by Catalano Gennaro and Halevi Eurocrypt 2000 but the standard approach for turning this into an asynchronous protocol would require a Byzantine agreement sub protocol Our protocol adopts their approach but exploits a feature of the problem in order to avoid the use of a Byzantine agreement primitive Hence it leads to efficient asynchronous protocols for threshold signatures and for Byzantine agreement based on the strong RSA assumption without the use of random oracles **Conference Proceedings** ,1999 **Engineering and Mining Journal** ,1906 **Hypertext** ,2001 Advance Working Papers ,1988 **Proceedings of the 1989 ACM Symposium on Parallel Algorithms and Architectures, June 18-21, 1989, Santa Fe, New Mexico** ,1989 **CHI 2002 : Changing the World, Changing Ourselves** Loren Terveen,2002 Handbook of Online Learning Kjell Erik Rudestam,Judith Schoenholtz-Read,2002-02-19 I found the book excellent and read every one of the 450 pages Many of the chapters reflect the Fielding Institute s focus on human and organizational behaviour educational leadership and organizational management The book will be particularly appropriate for readers from a corporate training or business school background though there is much for academics and online educators at all levels and subject areas to learn from this well crafted book There are many books and articles about online learning This is one of the better ones Robin Mason Computers and Education Technology mediated instruction has taken the university and the corporate sector by storm As

more instructors teach online for a dispersed learning community in both academic and business environments there is a need for resources that will help them adapt to this new teaching method Educators who come out of traditional academic institutions tend to use traditional methods when offering courses online e g lectures textbooks and readings examinations rather than attend to small group processes and principles of what the editors of this volume call andragogy This Handbook goes beyond the mechanics of how to create and direct an online learning experience to consider such a new approach to pedagogy in doing so The editors primary purpose is to clarify the conceptual issues that underlie effective online teaching and to offer practical guidance to educators and corporate trainers who plan to teach in a virtual environment Their central tenet is the adoption of computer networks as the teaching vehicle of the future demands a re examination of our core beliefs about pedagogy and how students learn The transfer of a classroom curriculum into cyberspace is deceptively simple but doing so without an appreciation of the nuances and implications of learning online ignores not only the potential of this medium but the inevitable realities of entering it Rather than fear the challenges that new technology brings to systems of learning the editors hope to help instructors embrace it by re thinking how knowledge is acquired and how educational processes may be optimally designed in a new age of teaching and learning Features Benefits Part I provides an overview and includes discussion of the unique structural aspects of the electronic learning environment pedagogical issues curriculum design psychological and group dynamics and ethical issues Part II examines practical issues associated with implementing courses online both in the traditional university setting and in professional corporate training environments The book draws heavily on personal case examples many from The Fielding Graduate Institute s 26 years of teaching in nontraditional distributed learning environments **Cassier's Engineering Monthly** ,1913
