full papers and 11 short papers included in this book were carefully reviewed and selected from 443 submissions. They were organized in two topical sections as follows Advanced Network Technologies and Intelligent Computing **Machine Vision in Plant Leaf Disease Detection for Sustainable Agriculture** M. F. Mridha, Nilanjan Dey, 2025-09-22 This book offers a comprehensive exploration of the intersection between advanced technology and agricultural sustainability. With a focus on leveraging machine vision techniques for the early detection and management of plant diseases, this book serves as a vital resource for researchers, practitioners, and stakeholders in the agricultural sector. The book begins by providing an overview of the challenges posed by plant diseases to global food security and agricultural sustainability. It highlights the limitations of traditional disease detection methods and underscores the need for innovative approaches that can offer timely and accurate diagnosis. Through a systematic examination of machine vision principles and methodologies, the book delves into the various stages of disease detection from image acquisition to feature extraction and classification. Key concepts such as image preprocessing, feature selection, and machine learning algorithms are discussed in detail with emphasis on their practical implementation in real-world scenarios. Moreover, the book explores the potential of machine vision to contribute to sustainable agriculture practices.

in the subject Engineering General grade 12 language English abstract The creation of a simulation model for closed loop vector controlled IPMSM drive performance enhancement and speed control is described in this book By regulating the torque component of the current the model achieves superior speed tracking and rapid dynamic response under transient and steady state circumstances The control technique is used by both the proportional and integrated controllers in the PI controller Combining two independent controllers and reducing the shortcomings of each results in a more effective controller To offer optimal speed operation in the face of environmental changes load variations and structural disturbances the Fuzzy Logic Controller for PMSM must be properly constructed Using MATLAB Simulink this book gives a comprehensive simulation of an internal permanent magnet synchronous motor driving system Interior permanent magnet synchronous motors IPMSMs are used to improve machine performance and offer rapid torque response IPMSMs are utilised in low and medium power applications such as servos robotics variable speed motors electric vehicles and computer peripherals Because PM motor drives are becoming more popular simulation systems capable of handling motor drive simulations are in great demand Simulation tools can dynamically simulate motor drives in a visual environment saving money and time and easing the development of new systems
