**Electric Vehicle Systems Architecture and Standardization Needs** Beate Müller, Gereon Meyer, 2015-02-25 This edited volume presents research results of the PPP European Green Vehicle Initiative EGVI focusing on Electric Vehicle Systems Architecture and Standardization Needs. The objectives of energy efficiency and zero emissions in road transportation imply a paradigm shift in the concept of the automobile regarding design materials and propulsion technology. A redesign of the electric and electronic architecture provides in many aspects additional potential for reaching these goals. At the same time standardization within a broad range of features, components and systems is a key enabling factor for a successful market entry of the electric vehicle (EV). It would lower production cost, increase interoperability and compatibility and sustain market penetration. Hence, novel architectures and testing concepts and standardization approaches for the EV have been the topic of an expert workshop of the European Green Vehicles Initiative PPP. This book contains the contributions of current European research projects on EV architecture and an expert view on the status of EV standardization. The target audience primarily comprises researchers and experts in the field.

*Renewable Energy for Plug-In Electric Vehicles* Thanikanti Sudhakar Babu, Praveen Kumar Balachandran, Nnamdi Nwulu, 2024-07-04 *Renewable Energy for Plug-In Electric Vehicles Challenges, Approaches and Solutions for Grid Integration* provides a holistic guide to the critical technical challenges of integrating renewable energy for grid connected electric vehicles. Considering the impact of renewable energy integration from a wide range of perspectives, this book leverages its global range and expertise to cover problems from power stability to market strategies, fast charging and cybersecurity. Practical solutions are provided incorporating the latest advances in technologies across meters, sensors, batteries, storage, demand response, artificial intelligence and power system design. Supporting broad understanding and practical solution development, the book enables researchers, students and industry professionals to take the next steps towards renewably sourced grid integrated electric vehicles. Focuses on the essential step of integrating grid charging electric vehicles with renewable energy sources. Provides comprehensive analysis of the challenge renewable integration presents for existing electric vehicle technologies. Breaks down real world practical case studies and solutions using the latest advances by a global team of experts.
