We Want Bama Joseph Goodman, 2021-11-09 A lively chronicle of how the 2020 Crimson Tide became Nick Saban's ultimate team Was Alabama's Crimson Tide in 2020 the greatest team of all time The squad went 13-0 in a pandemic year scored a combined 107 points against SEC powerhouses LSU and Florida crushed Ohio State in a National Championship Game 52-24 in a contest that wasn't even that close and followed it up with another top rated signing class Nick Saban called his boys the ultimate team but it wasn't just because they kicked the ever living hell out of everyone on the football field It was because the team leveraged a power and influence born of Southern pride to push back against a hateful legacy of racism that a populist president was exploiting to divide the nation At a time when Americans needed real leaders in the face of so much hate the sports world answered the call and fought back for the soul of the country In the summer of 2020 the Tide players left their training facility and led by their celebrated coach marched to a campus doorway made infamous sixty years earlier by another political demagogue and showed what people can accomplish when they fight together for a just cause in the name of unity The most powerful force in a state crazy for college football had chosen to make a stand and replace George Wallace's Segregation forever with a different message written by one of the players All lives can't matter until Black lives matter There have been some great football teams through the years and they all deserve respect But here's what we know for sure They all would have been appreciative of what this Alabama team represented and proud of what it accomplished The Crimson Tide in 2020 captured something special that moved it beyond the conversation of best ever and into the place reserved for most important of all time

Routledge Handbook of Sedentary Behaviour Lee Smith, Mark A Tully, 2025-12-18 Routledge Handbook of Sedentary

Behaviour assesses the field and provides an in depth update on sedentary behaviour research Sedentary behaviour is defined as any waking behaviour where the energy expenditure is low and the predominant posture is sitting reclining or lying Evidence is rapidly accumulating that sedentary behaviour is associated with poor health outcomes Over the past 20 years time spent sitting has increased dramatically as people spend more time sitting for work commuting and leisure Excessive sedentary behaviour has been associated with an increased risk of numerous noncommunicable diseases The field of sedentary behaviour research is rapidly developing This book provides a source of information on the epidemiological trends in sedentary behaviour across the life course Innovations in quantifying sedentary behaviour have led to a number of developments in tools used to measure sedentary behaviour and this book reviews their relative merits Our understanding of the range of physical and mental health effects continues to expand and these are discussed including likely causal mechanisms Following this the effectiveness of various interventions within different populations is presented Finally the text summarises these advances in knowledge and gives direction to new areas for future research The text offers students researchers and academics an up to date summary of the sedentary behaviour evidence base and serves as a catalyst for future research through summaries of future research areas that remain addressed
