Rich Gibson, Schuyler Erle, 2006-01-17. Want to find every pizza place within a 15 mile radius? Where the dog parks are in a new town? The most central meeting place for your class, club, or group of friends? The cheapest gas stations on a day-to-day basis? The location of convicted sex offenders in an area to which you may be considering moving? The applications serendipitous and serious seem to be infinite as developers find ever more creative ways to add to and customize the satellite images and underlying API of Google Maps. Written by Schuyler Erle and Rich Gibson, authors of the popular *Mapping Hacks*, *Google Maps Hacks* shares dozens of tricks for combining the capabilities of Google Maps with your own datasets. Such diverse information as apartment listings, crime reporting, or flight routes can be integrated with Google's satellite imagery in creative ways to yield new and useful applications. The authors begin with a complete introduction to the standard features of Google Maps. The adventure continues with 60 useful and interesting mapping projects that demonstrate ways developers have added their own features to the maps. After that's given you ideas of your own, you learn to apply the techniques and tools to add your own data to customize and manipulate Google Maps. Even Google seems to be tacitly blessing what might be seen as unauthorized use, but maybe they just know a good thing when they see one. With the tricks and techniques you'll learn from *Google Maps Hacks*, you'll be able to adapt Google's satellite map feature to create interactive maps for personal

and commercial applications for businesses ranging from real estate to package delivery to home services transportation and more Includes a foreword by Google Maps tech leads Jens and Lars Rasmussen **Beginning Google Maps API 3** Gabriel Svennerberg, 2010-09-08 This book is about the next generation of the Google Maps API It will provide the reader with the skills and knowledge necessary to incorporate Google Maps version 3 on web pages in both desktop and mobile browsers It also describes how to deal with common problems that most map developers encounter at some point like performance and usability issues with having too many markers and possible solutions to that Introduction to the Google Maps API version 3 Solutions to common problems most developers encounters too many markers common JavaScript pitfalls Best practices using HTML CSS JavaScript and Google Maps
