**Reading and Language Arts Classroom Instruction in Mississippi** Sarah Elizabeth Campbell,2009 The purpose of this study was to understand what No Child Left Behind NCLB meant to teachers in Mississippi and to determine what impact this reform had on reading and language arts classroom instruction for teachers Qualitative research methods in the form of interview data and classroom observations were used to examine teachers perceptions of accountability and its effects on classroom instruction Teachers were asked to answer a set of research interview questions related to research questions The specific research questions used to explore teachers perceptions about accountability were 1 What are reading and language arts teachers perceptions of accountability 2 What are teachers perceptions of the influence of state testing on reading and language arts classroom instruction and 3 How do elementary and middle school teachers prepare students for end of year reading and language arts state test The researcher gathered qualitative data from five teachers with teaching experience ranging from 5 years to 30 years of teaching experience Each teacher who participated in this study was familiar with administering Mississippi Curriculum Test 2 MCT2 at the elementary and middle school level The results of this study indicated that teachers believe that the Mississippi accountability system is effective for improving the teaching and learning process but not for holding schools and districts accountable Each teacher in this study believed that test scores alone were not effective for addressing the familial and societal issues many schools face on a day to day basis and as a result using test scores to determine school quality was unrealistic Of the five teachers interviewed four reported engaging students in meaningful learning activities that put emphasis on the significance of language arts in daily life These teachers were also observed placing more emphasis on rubric based assessments classroom writing activities and student centered activities as a result of the 2006 Mississippi Language Arts Framework Revised and MCT2 Recommendations for further research include investigating whether the impact of teachers professional experience influences student achievement or whether the impact of the building principal s perceptions of the framework impact classroom instruction and teachers perceptions

Single Gender Language Arts Classes and the Impact on Achievement of Males Brock English, 2014 The purpose of this causal comparative research design was to analyze the relationship between Language Arts scale scores of elementary male students on the Mississippi Curriculum Test Version 2 MCT2 and the type of classroom mixed gender or single gender The study also analyzed the percentage of questions answered correctly on the MCT2 in the English Language Arts sub categories of vocabulary reading comprehension writing and grammar Archival data of 222 students was used 100 male students in single gender classes and

122 students in mixed gender classes. The study was conducted in an urban elementary public school with a diverse population in northeast Mississippi. The study did not reveal any significant differences in the overall achievement of third and fourth grade males in single gender classes compared to mixed gender classes; however, significant differences were found in fifth grade overall scale scores in the single gender classes. Furthermore, the study did not reveal any significant differences in the percentages of questions answered correctly in vocabulary, reading comprehension, writing, and grammar of third and fourth grade males in single gender classes. However, significant differences were found in the overall percent correct for fifth grade reading comprehension and writing. Results indicate there is no advantage in terms of achievement in English Language Arts for third and fourth grade males in single gender classes, but there is a moderate effect of single gender education on fifth grade scale scores reading comprehension and writing. Suggestions for further research are also included. Teacher's Edition with Poster, Grade 2 McGraw Hill, 2002-10. **An Examination of a Relationship Between Reading Attitudes and Reading Achievement for a Group of Sixth Grade Students**, 2013. The importance of reading proficiency is unquestioned. Although the nation has set a goal for all students to be proficient in reading, many of the nation's students are not proficient readers. The vast majority of research examining reading proficiency and reading achievement has concentrated on the cognitive aspects of reading and the use of scientifically based reading interventions. However, there is a body of literature that suggests that reading achievement is related to attitudes toward reading. The purpose of this study was to determine the recreational and academic reading attitudes of a group of sixth grade students and to determine if their attitudes toward reading were related to measures of their reading achievement. This study was guided by seven research questions and utilized three research designs. Descriptive research was used to answer research questions one and two, which sought to determine the recreational and academic reading attitudes of the sixth grade students participating in this study. Causal comparative research was used to answer research questions three and four, which compared measures of academic and recreational reading attitudes by gender and ethnicity. Research questions five, six, and seven were answered using correlational research to determine if measures of reading attitudes were related to the scores on the language arts portion of the MCT2. The results of data analyzed to answer the research questions revealed that overall the sixth grade participants in this study had reading attitudes that were less than positive. The results also revealed that males had reading attitudes that were more positive than females. The results of the analysis of reading attitudes by ethnicity revealed that African American students had higher measures of positive recreational reading attitudes than Caucasian students and the students in the other ethnic group while Caucasian students had higher measures of positive academic reading attitudes than African

American students and students in the other ethnic group The only significant relationship discovered between measures of reading attitude and MCT2 scores was a very weak relationship between measures of academic reading attitudes and the language arts section of the MCT2 The study concludes with recommendations for further research *The Language Arts Manual* Adrianna Gatlin,Michelle Eichner,Sarah Stegall,Antoinette Earnhardt,Language 4 All,2019-07 Do you need help writing an essay Would a quick reference chart on the parts of speech or the major literary terms followed by detailed examples of their usage make your English course easier for you Do you learn best with visuals and models check lists and step by step instructions From the guidelines for both MLA 8 and APA 7 including samples and how to correctly write and cite with research to reading strategies literary terms and how to professionally email and craft resumes the Language Arts Manual has it all in one clear and concise guide to help you succeed whether in the classroom or online Covering the essentials in reading writing and grammar for 6th 12th grade students and beyond this source is a chart based system created and refined by four English teachers with over 50 years of teaching experience in all levels of Language Arts from ESE to AP 6th through college level The manual will help students become strong independent writers and can be used to aid with any English assignment Whether you are homeschooling doing online learning or returning to the traditional classroom setting this manual will help your student succeed
