**Addressing Epistemic Injustice in Mental Health** Karen Newbigging, Anthony Salla, Ulla-Karin Schön, Colin King, 2024-03-20 Epistemic injustice was conceptualized by Fricker as a form of social injustice which occurs when people's authority as a knower is ignored, dismissed or marginalized. It is attracting increasing interest in the mental health field because of the asymmetries of power between people using mental health services and mental health professionals. People experiencing mental health distress are particularly vulnerable to epistemic injustice as a consequence of deeply embedded social stigma, negative stereotyping and assumed irrationality. This is amplified by other forms of stereotyping or structural discrimination including racism, misogyny and homophobia. Consequently, individual testimonies may be discounted as both irrational and unreliable. Epistemic injustice also operates systemically reflecting social and demographic characteristics such as race, gender, sexuality or disability or age.

*Handbook of Counseling and Psychotherapy in an International Context* Roy Moodley, Uwe P. Gielen, Rosa Wu, 2013-05-07 Many factors in the world today such as globalization and a rise in immigration are increasing the need for mental health practitioners to acquire the ability to interact effectively with people of different cultures. This text will be the most comprehensive volume to address this need to date, exploring the history, philosophy, processes and trends in counseling and psychotherapy in countries from all regions of the globe. Organized by continent and country, each chapter is written by esteemed scholars drawing on intimate knowledge of their homelands. They explore such topics as their countries' demographics, counselor education programs, current counseling theories and trends, and significant traditional and indigenous treatment and healing methods. This consistent structure facilitates quick and easy comparisons and contrasts across cultures, offering an enhanced understanding of diversity and multicultural competencies. Overall, this text is an invaluable resource for practitioners, researchers, students, and faculty, showing them how to look beyond their own borders and cultures to enhance their counseling practices.

*Exploring New Horizons in Career Counselling* Kobus Maree, Annamaria Di Fabio, 2015-11-03 This book brings together eminent global theorists and practitioners to share their views on the evolution of career counselling in recent decades. Multiple changes of a fundamental and complex nature as well as related challenges in the world of work have necessitated career counselling to undergo such an evolution. The authors examine the future nature and scope of new directions in the field of career counselling psychology and they critically reflect on as well as promote the predominant theoretical and conceptual framework of the field of career counselling. The latest models and methods in and for the 21st century are explored and teased out, including Mark Savickas' proposal to shift the focus in interventions from conceptualising the self as content to seeing the self as a process. This approach is in keeping with the notion of career as a story and consistent with leading theories such as Jean Guichard's self construction framework and the life design paradigm. The authors deliver an avant garde text that is easy to read and use without diluting the conceptual and terminological complexities of the field. The book is an invaluable resource for new
