Multinational Federations Routledge Studies In Federalism And Decentralization:

Multinational Federations Michael Burgess, John Pinder, 2007-04-11 This is the first comparative volume available on multinational federations bringing together an international range of experts on federalism. Multinational federations are federal states intended to provide a framework that can accommodate, manage and resolve some of the most intractable political conflicts of our time that emerge from identity politics those that stem from competing national visions whether within or between established states. Featuring key experts in the field such as Michael Burgess, Alain Gagnon and Ronald Watts this unique book draws on a wide geographical range of country studies including Belgium, Canada, India, Malaysia, Spain, Russia, Cyprus, India, Switzerland and the EU in order to illustrate the pivotal relationship between federalism and nationalism. In so doing it addresses the practical relevance of federalism to the new political recognition of difference and diversity in the specific form of national minoritarianism. Multinational Federations will be of strong interest to students and researchers of federalism, democracy and nationalism.

Emerging Practices in Intergovernmental Functional Assignment

Gabriele Ferrazzi, Rainer Rohdewohld, 2017-06-26 Attaining the benefits of especially fiscal decentralization in government remains an enduring challenge in part because the re arrangement of public functions across levels of government has often been carried out poorly. This book aims to provide a firmer conceptual basis for the re arrangement of public functions across levels of government. In doing so it offers practical advice for policy makers from developing and emerging countries and development cooperation practitioners engaged in such activity. Combining a theoretical approach for inter governmental functional assignment with an in depth analysis of real life country cases where functional assignment FA has been supported in the context of international development cooperation it underscores the common technical and political challenges of FA and also demonstrates the need to expect and support country made and context specific solutions to FA processes and results. Examples are drawn from a number of developing transition countries from the Asia Pacific region, Africa and the OECD which outline and suggest advisory approaches, tools, principles and good practices and approaches. This text will be of key interest to scholars, students, policy makers and practitioners in public policy, decentralization, local governance studies, public administration and development administration studies. Cultural Policy and Federalism Jonathan Paquette, 2019-04-25

This book explores how federalism a unique social and political reality that influences policy development and implementation contributes to shaping cultural policies in a variety of federations. Building on the cases of a wide variety of countries including Argentina, India and Australia this book presents the typical and distinctive institutional challenges that federalism brings to cultural policy. In particular this book emphasizes four dimensions the institutional and constitutional division of cultural powers the governmental structures of cultural policy and the dynamics of cooperation and competition established between subnational and federal powers local

cultural policies capital cities and the place of municipal government and the development of subnational cultural relations Finally this book also acknowledges the diversity of federations and federalisms and provides a portrait of different types of relationships between federal institutions and the cultural sphere **Strategy in a Turbulent Era** Ashton L. Multiculturalism Christopher S. Raj, Marie McAndrew, 2009 Transcripts of papers presented at an international conference **Constitutional Politics in Multinational Democracies** André Lecours, Nikola Brassard-Dion, Guy Laforest, 2021-07-15 Constitutional politics is exceptionally intense and unpredictable It involves negotiations over the very nature of the state and the implications of self determination Multinational democracies face pressing challenges to the existing order because they are composed of communities with distinct cultures histories and aspirations striving to coexist under mutually agreed upon terms Conflict over the recognition of these multiple identities and the distribution of power and resources is inevitable and indeed part of what defines democratic life in multinational societies In **Constitutional Politics in Multinational Democracies** André Lecours, Nikola Brassard Dion and Guy Laforest bring together experts on multinational democracies to analyze the claims of minority nations about their political future and the responses they elicit through constitutional politics Essays focus on the nature of these states and the actors and political process within them This framework allows for a multidimensional examination of crucial political periods in these democracies by assessing what

constitutional politics is who is involved in it and how it happens Case studies include Catalonia and Spain Puerto Rico and the United States Scotland and the United Kingdom Belgium Bosnia and Herzegovina and Quebec and the M tis People in Canada Theoretically significant and empirically rich Constitutional Politics in Multinational Democracies is a necessary read for any student of multinationalism

Multinational Federalism and Value Pluralism Ferran Requejo,2004-08-02 This book addresses the issue of whether or not federalism be a fair and workable way of articulating multinational societies according to revised liberal democratic patterns

The Case for Multinational Federalism Alain-G. Gagnon,2009-09-10 Throughout the world liberal democracies are grappling with increasing claims made in the name of minority national socio cultural and ethno cultural identities that seek greater recognition in the institutions of the nation state This work inserts itself into debates centred on diversity through a normative and empirical analytical assessment of the political sociology of multinational democracies The main thread of the arguments put forward is that federalism in both its institutional manifestations and its sociological properties constitutes a promising avenue for the management of cohabitating political communities and for the affirmation

of collective identities within states that are constituted by two or more nations Author Alain G Gagnon develops his argument by contending that the federal principle allows for the exercise of advanced democratic practices within nation states permitting internal nations to openly affirm the bases of adherence to a common political project At the same time he argues that federalism nourishes the development of distinct collective traditions that serve to benefit all parties to the association It is concluded that only in such a scenario will the elusive pursuit of an authentic and shared loyalty underpin multination states and ensure their stability in contrast to the instrumental sentiments of belonging engendered by procedural territorial federal models Focusing primarily on the Canadian case this book also draws inspiration from other federal states Belgium the United States as well as federalizing states Spain the United Kingdom It will be of keen interest to students and scholars of Politics European Studies along with Nationalism and Federalism Studies

Community,

Scale, and Regional Governance Liesbet Hooghe,Gary Marks,2016-08-18 This is the second of five ambitious volumes theorizing the structure of governance above and below the central state This book is written for those interested in the character causes and consequences of governance within the state The book argues that jurisdictional design is shaped by the functional pressures that arise from the logic of scale in providing public goods and by the preferences that people have regarding self government The first has to do with the character of the public goods provided by government their scale economies externalities and informational asymmetries The second has to do with how people conceive and construct the groups to which they feel themselves belonging In this book the authors demonstrate that scale and community are principles that can help explain some basic features of governance including the growth of multiple tiers over the past six decades how jurisdictions are designed why governance within the state has become differentiated and the extent to which regions exert authority The authors propose a postfunctionalist theory which rejects the notion that form follows function and argue that whilst functional pressures are enduring one must engage human passions regarding self rule to explain variation in the structures of rule over time and around the world Transformations in Governance is a major new academic book series from Oxford University Press It is designed to accommodate the impressive growth of research in comparative politics international relations public policy federalism environmental and urban studies concerned with the dispersion of authority from central states up to supranational institutions down to subnational governments and sideways to public private

networks It brings together work that significantly advances our understanding of the organization causes and consequences of multilevel and complex governance The series is selective containing annually a small number of books of exceptionally high quality by leading and emerging scholars The series targets mainly single authored or co authored work but it is pluralistic in terms of disciplinary specialization research design method and geographical scope Case studies as well as comparative studies historical as well as contemporary studies and studies with a national regional or international focus are all central to its aims Authors use qualitative quantitative formal modeling or mixed methods A trade mark of the books is that they combine scholarly rigour with readable prose and an attractive production style The series is edited by Liesbet Hooghe and Gary Marks of the University of North Carolina Chapel Hill and the VU Amsterdam and Walter Mattli of the University of Oxford

Malloy, Francesco Palermo, 2015-10-08 Minority Accommodation through Territorial and Non Territorial Autonomy explores the relationship between minority territory and autonomy and how it informs our understanding of non territorial autonomy NTA as a strategy for accommodating ethno cultural diversity in modern societies While territorial autonomy TA is defined by a claim to a certain territory NTA does not assume that it is derived from any particular right to territory allocated to groups that are dispersed among the majority while belonging to a certain self identified notion of group identity In seeking to understand the value of NTA as a public policy tool for social cohesion this volume critically dissects the autonomy arrangements of both NTA and TA and through a conceptual analysis and case study examination of the two models rethinks the viability of autonomy arrangements as institutions of diversity management This is the second volume in a five part series exploring the protection and representation of minorities through non territorial means examining this paradox within law and international relations with specific attention to non territorial autonomy NTA **Routledge Handbook of Regionalism & Federalism** John Loughlin, John Kincaid, Wilfried Swenden, 2013-07-18 Almost all states are either federal or regionalized in some sense It is difficult to find a state that is entirely unitary and the Routledge Handbook of Regionalism and Federalism necessarily takes in almost the entire world Both federalism and regionalism have been subjects of a vast academic literature mainly from political science but sometimes also from history economics and geography This cutting edge examination seeks to evaluate the two types of state organization from the perspective of political science producing a work that is analytical rather than simply descriptive The Handbook presents some of the latest theoretical reflections on regionalism and federalism and then moves on to discuss cases of both regionalism and federalism in key countries chosen from the world's macro regions Assembling this wide range of case studies allows the book to present a general picture of current trends in territorial governance The final chapters then examine failed federations such as Czechoslovakia and examples of transnational regionalism the EU NAFTA and the African Union Covering evolving forms of federalism and regionalism in all parts of the world and featuring a comprehensive range of case studies by leading international scholars this work will be an essential reference source for all students and scholars of international politics comparative politics and international relations **Fiscal Decentralization to Rural Governments in India** Geeta Sethi, 2004 With special references to Karnataka and Kerala two states of India
