## **Multiple Constructions Language Benjamins Current:**

**On Multiple Source Constructions in Language Change** Hendrik De Smet, Lobke Ghesquière, Freek Van de Velde, 2015-11-15 In much writing on language change there is a tacit assumption that change operates on a single source construction to produce an innovative target construction This volume challenges this assumption by showing that many changes involve interactions between multiple source constructions In fact the involvement of multiple source constructions is unexceptional The phenomenon is observed in phonology morphology syntax and semantics It is seen in language internal change as well as in contact induced change Interactions may obtain between independent but historically related constructions as well as between historically unrelated constructions The contributions to this volume on the one hand present specific case studies on changes involving multiple source constructions in various domains of grammar and in a variety of languages On the other hand they discuss how such changes can be accommodated in current theoretical models of language Originally published in *Studies in Language* Vol 37 3 2013

**Manual of Romance Morphosyntax and Syntax** Andreas Dufter, Elisabeth Stark, 2017-09-25 This volume offers theoretically informed surveys of topics that have figured prominently in morphosyntactic and syntactic research into Romance languages and dialects We define syntax as being the linguistic component that assembles linguistic units such as roots or functional morphemes into grammatical sentences and morphosyntax as being an umbrella term for all morphological relations between these linguistic units which either trigger morphological marking e g explicit case morphemes or are related to ordering issues e g subjects precede finite verbs whenever there is number agreement between them All 24 chapters adopt a comparative perspective on these two fields of research highlighting cross linguistic grammatical similarities and differences within the Romance language family In addition many chapters address issues related to variation observable within individual Romance languages and grammatical change from Latin to Romance

Discourse Constructions in English Aneider Iza Erviti, 2021-05-29 This book emphasizes the advantages of examining discourse connectivity from a constructionist perspective and highlights the role of discourse configurations in the construction of meaning The research contained advances the field of cognitive classification and categorization of discourse constructions The text is a great improvement in the discourse analysis literature since it uniquely clarifies the subtleties of meaning between different discourse markers that are frequently treated as equivalent by lexicographers It is unique in being the first contribution to the creation of a Constructicon at the discourse level and it fills an important gap within cognitively oriented constructionist accounts that have mostly restricted their analyses to argument structure and illocutionary constructions This yearbook appeals to students and researchers working within corpus linguistics

Edward Jewitt Wheeler, Frank Crane, 1889 **Morphologie** G. E. Booij, Christian Lehmann, Joachim Mugdan, 2000 This series of HANDBOOKS OF LINGUISTICS AND COMMUNICATION SCIENCE is designed to illuminate a field which not only includes general linguistics and the study of linguistics as applied to specific languages but also covers those more recent areas which have developed from the increasing body of research into the manifold forms of communicative action and interaction For classic linguistics there appears to be a need for a review of the state of the art which will provide a reference base for the rapid advances in research undertaken from a variety of theoretical standpoints while in the more recent branches of communication science the handbooks will give researchers both an overview and orientation To attain these objectives the series will aim for a standard comparable to that of the leading handbooks in other disciplines and to this end will strive for comprehensiveness theoretical explicitness reliable documentation of data and findings and up to date methodology The editors both of the series and of the individual volumes and the individual contributors are committed to this aim The languages of publication are English German and French The main aim of the series is to provide an appropriate account of the state of the art in the various areas of linguistics and communication science covered by each of the various handbooks however no inflexible pre set limits will be imposed on the scope of each volume The series is open ended and can thus take account of further developments in the field This conception coupled with the necessity of allowing adequate time for each volume to be prepared with the necessary care means that there is no set time table for the publication of the whole series Each volume will be a self contained work complete in itself The order in which the handbooks are published does not imply any rank ordering but is determined by the way in which the series is organized the editor of the whole series enlist a competent editor for each individual volume Once the principal editor for a volume has been found he or she then has a completely free hand in the choice of co editors and contributors The editors plan each volume independently of the others being governed only by general formal principles The series editor only intervene where questions of delineation between individual volumes are concerned It is felt that this modus operandi is best suited to achieving the objectives of the series namely to give a competent account of the present state of knowledge and of the perception of the problems in the area covered by each volume **Benjamin's Treatise on the Law of Sale of Personal Property** Judah Philip Benjamin, 1884

**Marking Oppositions in Verbal and Nominal Collectives** Suzanne Kemmer, 1993 Multilingual Memories Robert Blackwood, Tommaso M. Milani, John Macalister, 2021-04-22 Drawing on a range of disciplines from within the humanities and social sciences Multilingual Memories addresses questions of remembering and forgetting from an explicitly multilingual

perspective From a museum at Victoria Falls in Zambia to a Japanese American internment in Arkansas this book probes how the medium of the communication of memories affirms social orders across the globe Applying linguistic landscape approaches to a wide variety of monuments and memorials from around the world this book identifies how multilingualism and its absence contributes to the inevitable partiality of public memorials Using a number of different methods including multimodal discourse analysis code preferences interaction orders and indexicality the chapters explore how memorials have the potential to erase linguistic diversity as much as they can entextualize multilingualism With examples from Africa Asia Australasia Europe and North and South America this volume also examines the extent to which multilingual memories legitimize not only specific discourses but also individuals particular communities and ethno linguistic groups often to the detriment of others      *The Works of Benjamin Franklin, Containing Several Political and Historical Tracts Not Included in Any Former Edition, and Many Letters Official and Private Not Hitherto Published* Benjamin Franklin, Jared Sparks, 1882

**Recent Development in Creole Studies** Dany Adone, 2003 Over the past few decades the book series Linguistische Arbeiten Linguistic Studies comprising over 500 volumes has made a significant contribution to the development of linguistic theory both in Germany and internationally The series will continue to deliver new impulses for research and maintain the central insight of linguistics that progress can only be made in acquiring new knowledge about human languages both synchronically and diachronically by closely combining empirical and theoretical analyses To this end we invite submission of high quality linguistic studies from all the central areas of general linguistics and the linguistics of individual languages which address topical questions discuss new data and advance the development of linguistic theory      **The True Story of**
