Hall Problem and it is one of the most interesting mathematical brain teasers of recent times In this light hearted yet ultimately serious book Jason Rosenhouse explores the history of this fascinating puzzle Using a minimum of mathematics and none at all for much of the book he shows how the problem illuminates fundamental mathematical issues and has abiding philosophical implications Perhaps most important he writes the problem opens a window on our cognitive difficulties in reasoning about uncertainty **Maths Tricks to Blow Your Mind** Kyle D Evans,2021-11-01 From the infamous Hannah s

sweets exam question to percentages life hacks viral math problems seem to capture the public's imagination without fail. This is often because they blow people's minds with their logic or there are multiple answers or no answer at all or they are just generally wacky. The same people who will openly celebrate that they never got math will fight tooth and nail with their Auntie on Facebook over whether the answer to  $60 - 60 \times 0.1$  is 61 or 1. It's 61 by the way. Why do friends and relatives

who would glaze over in a math lesson pile into a discussion with strangers on social media over why the grey elephant comes from Denmark Math teacher and award winning science communicator Kyle D Evans wants to explore exactly what it is about viral social media puzzles that is so appealing Maths Tricks to Blow Your Mind presents 50 or so viral math problems from recent years with background information explanations and solutions to similar problems all in a humorous accessible and inclusive manner Want to dazzle and delight your friends and family This book shows you how  Kjartan Poskitt,2010 An alternative guide to maths which introduces One Finger Jimmy Chainsaw Charlie and their ghastly gangster friends who are living proof that maths really can be murderous Among the items featured is how to rescue someone in deadly peril and how not to shoot yourself with a cannon Publisher s note for original English edition *How to Build a Brain* Richard Elwes,2011 Can you outrun a bullet How do you build an electronic brain Is it possible to create an unbreakable code Could you slow down time How do you unleash chaos If you thought mathematics was all about measuring angles in a triangle or factorizing equations think again How to Build a Brain and 34 other really interesting uses of mathematics demystifies the astonishing world of maths in a series of intriguing entertaining and often extraordinary scenarios that explain key concepts in plain and simple language You ll find out how to unknot your DNA how to count like a supercomputer and how to become famous for solving mathematics most challenging problem You ll learn essential survival skills such as how to survive in a whirlpool how to slay a mathematical monster and how to be alive and dead at the same time And along the way you ll discover some plain old cool stuff like how to unleash chaos how to create an unbreakable code and how to use the mathematics to win at roulette or avoid going to prison So if you want to get to grips with the great questions of number theory and geometry the mysteries of the prime numbers or Plato s classification of regular polyhedra or if you are really more interested in learning how to have beautiful children or how to make a million on the stock market this is the perfect introduction to the fascinating world of modern mathematics Maths 1001 Dr Richard Elwes,Richard Elwes,2017-07-06 The ultimate smart reference to the world of mathematics from quadratic equations and Pythagoras Theorem to chaos theory and quantum computing Maths 1001 provides clear and concise explanations of the most fascinating and fundamental mathematical concepts Distilled into 1001 bite sized mini essays arranged thematically this unique reference book moves steadily from the basics through to the most advanced of ideas making it the ideal guide for novices and mathematics enthusiasts Whether used as a handy reference an informal self study course or simply as a gratifying dip in this book offers in one volume a world of mathematical knowledge for the general reader Maths 1001 is an incredibly comprehensive guide spanning all of the key mathematical fields including Numbers Geometry Algebra Analysis Discrete Mathematics Logic and the Philosophy of Maths Applied Mathematics Statistics and Probability and Puzzles and Mathematical Games From zero and infinity to relativity and Godel s proof that maths is incomplete Dr Richard Elwes explains the key concepts of mathematics in the simplest language with a minimum of jargon Along the way he reveals

mathematical secrets such as how to count to 1023 using just 10 fingers and how to make an unbreakable code as well as answering such questions as Are imaginary numbers real How can something be both true and false Why is it impossible to draw an accurate map of the world And how do you get your head round the mind bending Monty Hall problem Extensive enlightening and entertaining this really is the only maths book anyone would ever need to buy **Ahmes' Legacy** Marcel Danesi,2018-12-13 This book looks at classic puzzles from the perspective of their structures and what they tell us about the brain It uses the work on the neuroscience of mathematics from Dehaene Butterworth Lakoff N ez and many others as a lens to understand the ways in which puzzles reflect imaginative processes blended with rational ones The book is not about recreational or puzzle based mathematics in and of itself but rather about what the classic puzzles tell us about the mathematical imagination and its impact on the discipline It delves into the history of classic math puzzles deconstructing their *raison d'etre* and describing their psychological features so that their nature can be fleshed out in order to help understand the mathematical mind This volume is the first monographic treatment of the psychological nature of puzzles in mathematics With its user friendly technical level of discussion it is of interest to both general readers and those who engage in the disciplines of mathematics psychology neuroscience and or anthropology It is also ideal as a textbook source for courses in recreational mathematics or as reference material in introductory college math courses **What Counts** Brian Butterworth,1999 Though he admits to not being particularly good at math Butterworth cognitive neuropsychology U College London the founder of the Mathematical Cognition journal contends that we all possess an inherent numerosity sense developed to different degrees of course The author bases his case on empirical research and historical speculation

Annotation copyrighted by Book News Inc Portland OR **Keys to Infinity** Clifford A. Pickover,1995-09-29 Takes readers through dozens of beguiling math mysteries to reveal the oddity and beauty of the infinite **Great Circle of Mysteries** Misha Gromov,2018-08-11 This visionary and engaging book provides a mathematical perspective on the fundamental ideas of numbers space life evolution the brain and the mind The author suggests how a development of mathematical concepts in the spirit of category theory may lead to unravelling the mystery of the human mind and the design of universal learning algorithms The book is divided into two parts the first of which describes the ideas of great mathematicians and scientists those who saw sparks of light in the dark sea of unknown The second part Memorandum Ergo reflects on how mathematics can contribute to the understanding of the mystery of thought It argues that the core of the human mind is a structurally elaborated object that needs a creation of a broad mathematical context for its understanding Readers will discover the main properties of the expected mathematical objects within this context called ERGO SYSTEMS and readers will see how these systems may serve as prototypes for design of universal learning computer programs This is a work of great poetical insight and is richly illustrated It is a highly attractive read for all those who welcome a mathematical and scientific way of thinking about the world **A Calculus of Ideas** Ulf Grenander,2012 This monograph reports a thought experiment with a

mathematical structure intended to illustrate the workings of a mind It presents a mathematical theory of human thought based on pattern theory with a graph based approach to thinking The method illustrated and produced by extensive computer simulations is related to neural networks Based mainly on introspection it is speculative rather than empirical such that it differs radically in attitude from the conventional wisdom of current cognitive science
