ridiculed by some scientists the idea of Earth as a vast interconnected living system has gained acceptance in recent decades We and all living things are more than inhabitants of Earth we are Earth an outgrowth of its structure and an engine of its evolution Life and its environment have coevolved for billions of years transforming a lump of orbiting rock into a cosmic oasis a planet that breathes metabolizes and regulates its climate Acclaimed science writer Ferris Jabr reveals a radical new vision of Earth where lush forests spew water pollen and bacteria to summon rain giant animals engineer the very landscapes they roam microbes chew rock to shape continents and microscopic plankton some as glittering as carved jewels remake the air and sea Humans are one of the most extreme examples of life transforming Earth Through fossil fuel consumption agriculture and pollution we have altered more layers of the planet in less time than any other species pushing Earth into a crisis But we are also uniquely able to understand and protect the planet s wondrous ecology and self stabilizing processes Jabr introduces us to a diverse cast of fascinating people who have devoted themselves to this vital work Becoming Earth is an exhilarating journey through the hidden workings of our planetary symphony its players its instruments and the music of life that emerges and an invitation to reexamine our place in it How well we play our part will determine what kind of Earth our descendants inherit for millennia to come

**The Routledge Handbook of Archaeology and Plastics** Genevieve Godin, Þóra Pétursdóttir, Estelle Praet, John Schofield, 2024-09-17 The Routledge Handbook of Archaeology and Plastics investigates the archaeology of the contemporary world through the lens of its most distinguishing and problematic material Plastics are ubiquitous and have been so for nearly three generations since they became widely used in the early 1950s Plastics will persist for millennia their legacies as toxic heritage being felt deep into the future In this book comprising 32 original at times disturbing and critically engaged contributions scholars from archaeology and other cognate disciplines explore plastics from a number of different angles and perspectives Together these contributions highlight the dilemma that plastics present their usefulness on the one hand and the threats they present to environmental health on the other The volume also explores the lessons that archaeologists can learn from plastics about episodes of mass production consumption and toxicity in the past and also importantly about the future This important and timely collection will therefore be of interest to all archaeologists irrespective of their period of study or their geographical focus and to students of archaeology and cultural heritage It will also be relevant for researchers and students in other fields of study that focus on plastics and their environmental and social impacts Ultimately this book concerns the contemporary world and the impact of people upon it through the archaeological lens
