*Impaired-driving Program Assessments: a Summary of Recommendations (1991 to 2003)*. Darrell W. Johnson, 2004 The National Highway Traffic Safety Administration NHTSA developed an assessment process that gives States an opportunity to conduct a review of their efforts to control impaired driving by an outside team of nationally recognized experts Each assessment examines a State's overall program and presents recommendations to improve or enhance it NHTSA reviewed 38 State assessment reports and found 2,982 individual recommendations including 852 that were identified as priority recommendations by the teams Most of the recommendations fit into 10 thematic areas 1 increasing deterrence by prioritizing enforcement efforts and enhancing the arrest prosecution and adjudication process 2 improving public information and education efforts related to prevention and deterrence 3 remedying problems involving DUI data and records reporting requirements offender tracking systems data linkages uniform traffic citations 4 enacting new laws or revising existing laws aimed at increasing the deterrence and or prevention of DUI 5 enhancing training for law enforcement prosecution and judicial personnel 6 evaluating programs and activities to combat impaired driving 7 providing sufficient resources for treatment and rehabilitation 8 improving inter intra governmental coordination and cooperation 9 providing funding including self sufficiency to provide for adequate resources personnel equipment and 10 developing or increasing task forces and or community involvement

**Driver License Manuals Best Practices** Deborah Meyers ((Of Partners In Brainstorms, Inc.)), 2005 Each motor vehicle jurisdiction in the United States has an established process by which it assesses the required knowledge of driver license applicants to determine whether they are able to operate their vehicles safely and thus qualify for a driver's license Corollary to that assessment process is the jurisdiction's responsibility to provide drivers with the information for which they are to be held responsible during the licensing exam and subsequently while operating their vehicle on our nation's roadways The primary means of providing this information to drivers is the jurisdiction's basic driver license manual This study was directed at identifying best practices with regard to the basic driver license manuals produced by motor vehicle jurisdictions To identify best practices three types of information sources were consulted 1 driver license manuals produced by motor vehicle jurisdictions throughout the country 2 driver safety information produced by relevant government agencies and private organizations and 3 research news education and popular literature Of 212 knowledge items recommended by the American Association of Motor Vehicle Administrators AAMVA for inclusion in driver manuals 119 were addressed by a majority 51% or more of the manuals reviewed and are considered best practices in subject matter content Additional topics that should be considered best practices in subject matter content are intersection safety particularly with regard to red light running sharing the road with trucks particularly emphasis on their No Zones road rage and aggressive driving driver distraction seatbelt usage particularly with regard to the jurisdiction's primary or secondary seatbelt laws and following distance with emphasis on the need for a three or four second gap With regard to

factors other than subject matter content it was found that most jurisdictional manuals 77% are smaller than the 8 1 2 in x 11 in size of the Arizona manual with 48% opting for the compact 5 1 2 in x 8 1 2 in More than half the jurisdictions produce a version of the manual in Spanish and more than a third of the jurisdictions produce a specialized driver manual directed at teen learners and their parents and encouraging parents active involvement in their teen s learning process **AAMVA Bulletin** ,1990 *Wisconsin Driver and Traffic Safety Education Guide* Wisconsin.
