Stereo: Comparative Perspectives on the Sociological Study of Popular Music in France and Britain Philippe Le Guern, 2016-04-01 The term Popular Music has traditionally denoted different things in France and Britain In France the very concept of popular music has been fiercely debated and contested whereas in Britain and more largely throughout what the French describe as the Anglo saxon world popular music has been more readily accepted as a description of what people do as leisure or consume as part of the music industry and as something that academics are legitimately entitled to study French researchers have for some decades been keenly interested in reading British and American studies of popular culture and popular music and have often imported key concepts and methodologies into their own work on French music but apart from the widespread use of elements of French theory in British and American research the Anglo saxon world has remained largely ignorant of particular traditions of the study of popular music in France and specific theoretical debates or organizational principles of the making and consuming of French musics French British and American research into popular music has thus coexisted with considerable cross fertilization for many years but the barriers of language and different academic traditions have made it hard for French and anglophone researchers to fully appreciate the ways in which popular music has developed in their respective countries and the perspectives on its study adopted by their colleagues This volume provides a comparative and contrastive perspective on popular music and its study in France and the UK News in the Internet Age New Trends in News Publishing OECD, 2010-10-18 This study provides an in depth treatment of the global newspaper publishing market and its evolution with a particular view on the development of online news and related challenges *Cultural Entrepreneurship in Africa* Ute Röschenthaler, Dorothea Schulz, 2015-11-19 This book seeks to widen perspectives on entrepreneurship by drawing attention to the diverse and partly new forms of entrepreneurial practice in Africa since the 1990s Contrary to widespread assertions figures of success have been regularly observed in Africa since pre colonial times The contributions account for these historical continuities in entrepreneurship and identify the specifically new political and economic context within which individuals currently probe and invent novel forms of enterprise Based on ethnographically contextualized life stories and case studies of female and male entrepreneurs the volume offers a vivid and multi perspectival account of their strategies visions and ventures in domains as varied as religious proselytism politics tourism media music prostitution funeral organization and education African cultural entrepreneurs have a significant economic impact attract the attention of large groups of people serve as role models for many youths and contribute to the formation of new popular cultures **La nouvelle presse masculine française** Estelle Bardelot, 2003 **Digital Media Worlds** Giuditta De Prato, Jean Paul Simon, 2014-05-13 Digital Media Worlds tracks the evolution of the media sector on its way toward a digital world It focuses on core economic and management issues cost structures value network chain business models in industries such as book publishing broadcasting film music newspaper and video game **Critique de la raison**
