Uber Vs. Taxi Joshua David Angrist, Sydnee Caldwell, Jonathan V. Hall, 2017 Ride hailing drivers pay a proportion of their fares to the ride hailing platform operator a commission based compensation model used by many internet mediated service providers To Uber drivers this commission is known as the Uber fee By contrast traditional taxi drivers in most US cities make a fixed payment independent of their earnings usually a weekly or daily medallion lease but keep every fare dollar net of expenses We assess these compensation models from a driver s point of view using an experiment that offered random samples of Boston Uber drivers opportunities to lease a virtual taxi medallion that eliminates the Uber fee Some drivers were offered a negative fee Drivers labor supply response to our offers reveals a large intertemporal substitution elasticity on the order of 1.2 At the same time our virtual lease program was under subscribed many drivers who would have benefitted from buying an inexpensive lease chose to opt out We use these results to compute the average compensation required to make drivers indifferent between ride hailing and a traditional taxi compensation contract The results suggest that ride hailing drivers gain considerably from the opportunity to drive without leasing *ECSM 2017 4th European Conference on Social Media Academic Conferences and Publishing Limited*, 2017-07-03 Postsocialist Politics and the Ends of Revolution Neda
