Medicaid And Devolution Medicaid And Devolution:

Medicaid and Devolution Frank J. Thompson, John J. DiIulio, 1998-06-01 How much responsibility for providing health care to the poor should be devolved from the federal government to the states Any answer to this critical policy question requires a careful assessment of the Medicaid program Drawing on the insights of leading scholars and top state health care officials this volume analyzes the policy and management implications of various options for Medicaid devolution Proponents of devolution typically express confidence that states can meet the challenges it will pose for them But as this book shows the degree to which states have the capacity and commitment to use enhanced discretion to sustain or improve health care for the poor remains an open question Their failure to attend to issues of politics implementation and management could lead to disappointment Chapters focus on such topics as Medicaid financing benefits and beneficiaries long term care managed care safety net providers and the appropriate division of labor between the federal government and the states The contributors are Donald Boyd Center for the Study of the States Lawrence D Brown Columbia University James R Fossett Rockefeller College Richard P Nathan Nelson A Rockefeller Institute of Government State University of New York Albany Michael Sparer Columbia University James Tallon United Hospital Fund and Joshua M Weiner the Urban Institute *Health Care Politics and Policy in America* Kant Patel, 1995 Fully updated for this new edition Health Care Politics and Policy in America combines background and context for the evolution of U S health care policy with analysis of recent trends and current issues The book introduces public policy students to the complex array of health care issues and health care professionals to the study of public policy It provides comprehensive coverage of policy issues related to health care at the federal state and provider patient levels from Medicare and Medicaid funding and managed care to medical liability law and ongoing debates over the beginning of life and end of life decisions Health Care Politics and Policy in America successfully integrates political ethical economic legal technological and medical factors in an issue focused survey of U S health care policy It includes a chronology of health care policy related events and legislation from 1798 through 2005 and an appendix comparing medical malpractice tort laws state by state **The New Politics of State Health Policy** Robert B. analysing the ramifications of the legitimacy crisis in our multi layered democracies and possible remedies Starting from a focus on the current policy debate over devolution and subsidiarity the book engages the reader in to the broader tension of comparative federalism Its authors believe that in spite of the fundamental differences between them both the EU and the US are in the process of re defining a federal vision for the 21st century This book represents an important new contribution to the study of Federalism and European integration which seeks to bridge the divide between the two It also bridges the traditional divide between technical legal or regulatory discussions of federal governance and philosophical debates over questions of belonging and multiple identities It is a multi disciplinary project bringing together historians political scientists and theorists legal scholars sociologists and political economists It includes both innovative analysis and prescriptions on how to reshape the federal contract in the US and the EU It includes introductions to the history of federalism in the US and the EU the current debates over devolution and subsidiarity the legal framework of federalism and theories of regulatory federalism as well as innovative approaches to the application of network analysis principal agent models institutionalist analysis and political theories of citizenship to the federal context The introduction and conclusion by the editors draws out cross cutting themes and lessons from the thinking together of the EU and US experiences and suggest how a federal vision could be freed from the hierarchical paradigm of the federal state and articulated around concepts of mutual tolerance and empowerment
