**geoENV VI - Geostatistics for Environmental Applications** Amílcar Soares,Maria João Pereira,Roussos Dimitrakopoulos,2008-03-12 This volume contains 40 selected full text contributions from the Sixth European Conference on Geostatistics for Environmental Applications geoENV IV held in Rhodes Greece October 25 26 2006 The objective of the editors was to compile a set of papers from which the reader could perceive how geostatistics is applied within the environmental sciences A few selected theoretical contributions are also included    *geoENV II — Geostatistics for Environmental Applications* Jaime Gómez-Hernández,A.O. Soares,Roland Froidevaux,2013-11-27 The Second European Conference on Geostatistics for Environmental Applications took place in Valencia November 18 20 1998 Two years have past from the first meeting in Lisbon and the geostatistical community has kept active in the environmental field In these days of congress inflation we feel that continuity can only be achieved by ensuring quality in the papers For this reason all papers in the book have been reviewed by at least two referees and care has been taken to ensure that the reviewer comments have been incorporated in the final version of the manuscript We are thankful to the members of the scientific

committee for their timely review of the scripts All in all there are three keynote papers from experts in soil science climatology and ecology and 43 contributed papers providing a good indication of the status of geostatistics as applied in the environmental field all over the world We feel now confident that the geoENV conference series seeded around a coffee table almost six years ago will march firmly into the next century

**Uncertainty in Remote Sensing and GIS** Giles M. Foody,Peter M.

Atkinson,2003-07-11 Remote sensing and geographical information science GIS have advanced considerably in recent years However the potential of remote sensing and GIS within the environmental sciences is limited by uncertainty especially in connection with the data sets and methods used In many studies the issue of uncertainty has been incompletely addressed

The situation has arisen in part from a lack of appreciation of uncertainty and the problems it can cause as well as of the techniques that may be used to accommodate it This book provides general overviews on uncertainty in remote sensing and GIS that illustrate the range of uncertainties that may occur in addition to describing the means of measuring uncertainty and the impacts of uncertainty on analyses and interpretations made Uncertainty in Remote Sensing and GIS provides

readers with comprehensive coverage of this largely undocumented subject Relevant to a broad variety of disciplines including geography environmental science electrical engineering and statistics Covers range of material from base overviews to specific applications Focuses on issues connected with uncertainty at various points along typical data analysis chains used in remote sensing and GIS Written by an international team of researchers drawn from a variety of disciplines Uncertainty in Remote Sensing and GIS provides focussed discussions on topics of considerable importance to a broad

research and user community The book is invaluable reading for researchers advanced students and practitioners who want to understand the nature of uncertainty in remote sensing and GIS its limitations and methods of accommodating it
