Ideology and power are central elements in the political social religious and cultural development of the North during the transition from the Viking to the Middle Ages While the medieval European Christian ideology of rulership has been widely discussed an analysis of the Nordic pre Christian ideology and of its confrontation with the new European ideals has so far been lacking This book examines the concepts and practices associated with chieftains earls and kings from the ninth to the thirteenth century the myths and rituals surrounding their position in a northern European warrior culture The analysis seems to indicate that important elements of the pre Christian ideology of rulership survived into the Christian Middle Ages either transformed or even simply transferred Contributors are Ian Beuermann Anders Hultg rd Jan Erik Rekdal Jens Peter Schj dt J n Vi ar Sigur sson Joanna Sk rzewska Gro Steinsland and Olof Sundqvist

## **Teaching Big History** Richard B.

Simon, Mojgan Behmand, Thomas Burke, 2015 Big History is a new field on a grand scale it tells the story of the universe over time through a diverse range of disciplines that spans cosmology physics chemistry astronomy geology evolutionary biology anthropology and archaeology thereby reconciling traditional human history with environmental geography and natural history Weaving the myriad threads of evidence based human knowledge into a master narrative that stretches from the beginning of the universe to the present the Big History framework helps students make sense of their studies in all

disciplines by illuminating the structures that underlie the universe and the connections among them Teaching Big History is a powerful analytic and pedagogical resource and serves as a comprehensive guide for teaching Big History as well for sharing ideas about the subject and planning a curriculum around it Readers are also given helpful advice about the administrative and organizational challenges of instituting a general education program constructed around Big History The book includes teaching materials examples and detailed sample exercises This book is also an engaging first hand account of how a group of professors built an entire Big History general education curriculum for first year students demonstrating how this thoughtful integration of disciplines exemplifies liberal education at its best and illustrating how teaching and learning this incredible story can be transformative for professors and students alike
