## Sleep Hacks Today:

*Technosleep* Catherine Coveney, Michael Greaney, Eric L. Hsu, Robert Meadows, Simon J. Williams, 2023-06-25 This book draws on a variety of substantive examples from science technology medicine literature and popular culture to highlight how a new technoscientifically mediated and modified phase and form of technosleep is now in the making in the global north at least and to discuss the consequences for our relationships to sleep the values we accord sleep and the very nature and normativities of sleep itself. The authors discuss how technosleep at its simplest denotes the coming together or entanglements of sleep and technology and sensitizes us to various shifts in sleep technology relations through culture time and place. In doing so it pays close attention to the salience and significance of these trends and transformations to date in everyday night life their implications for sleep inequalities and the related issues of sleep and social justice they suggest.

**Sleep Hacking for Busy Bees: Optimizing Sleep in Short Bursts** Ethan West, In our frenetic modern world the quest for efficiency often comes at a steep price. We juggle demanding careers personal responsibilities and social obligations all while trying to maintain a semblance of balance. Amidst this relentless hustle one crucial aspect of our well being frequently gets shortchanged sleep. Have you ever caught yourself wondering How can I get the most out of my sleep in the little time I have? If so you're not alone. This book delves into the art and science of sleep hacking a practice designed to optimize sleep for those who lead busy lives. But before we delve into the nitty gritty let's explore why sleep is non-negotiable. Sleep is often perceived as a luxury something we can afford to cut back on to squeeze in an extra hour of work or play. Yet research consistently underscores that sleep is foundational to our health and well being. According to the National Sleep Foundation adults need between 7 to 9 hours of sleep per night for optimal functioning. However a staggering one in three adults doesn't meet this requirement leading to a host of physical and mental health issues. So why is sleep so important?

Today's Health, 1972     *Visions of Invasion* Michael Lechuga, 2023-03-02 *Visions of Invasion* Alien Affects Cinema and Citizenship in Settler Colonies explores how the US government mobilizes media and surveillance technologies to operate a highly networked multidimensional system for controlling migrants. Author Michael Lechuga focuses on three arenas where a citizenship control assemblage manufactures alienhood: Hollywood extraterrestrial invasion film, federal antimigration and border security legislation and various immigration enforcement protocols implemented along the Mexico-United States border. Building on rhetorical studies, settler colonial studies and media studies, *Visions of Invasion* offers a glimpse at how the processes of alien making contribute to an ongoing settler colonial project in the US. Lechuga demonstrates that popular films like *The War of the Worlds*, *Predator*, *Men in Black* and more participate in the production of migrants as subjective terrorists, felons and other noncitizen personae vilified in public discourse. Beyond just tracing how alien invasion narratives circulate in popular media, Lechuga describes how the logics motivating early US colonists materialize in both the US's citizenship control policy and in some of the country's most popular texts. Beneath each of the film franchises and antimigrant

political expressions described in Visions of Invasion lies an anxious colonial logic in which the settler way of life is seemingly threatened by false narratives of imminent invasion from abroad The volume offers a deep dive into how the rhetorical figure of the alien has been manufactured as a political subjectivity one that plays out the anxieties guilts and fears of colonialism in today s science fiction landscape School-based Practice with Children and Youth Experiencing Homelessness James Park Canfield,2015 This is one of the first books to focus on child homelessness in the context of school social work and related professional practice Beginning with ways to think about homelessness the book guides the reader through the important studies and findings as they relate to school social workers and other related professionals It provides readers with a detailed and thoughtful description of important policies that shape practice with homeless students and offers guidance on assessing perceived policy implementation Altered Perceptions Yvonne Stewart Williams,2010-02-09 Description Altered

back into the distant past Orwell's novel Nineteen Eighty Four continues to have a huge readership and to help shape the world of 2084 Sales of Orwell's terrifying tale have recently spiked because of current worries about alternate facts post truth and fake news 1984 and Philosophy brings together brand new up to the minute thinking by philosophers about Nineteen Eighty Four as it relates to today's culture politics and everyday life Some of the thinking amounts to thoughtcrime but we managed to sneak it past the agents of the Ministry of Truth so this is a book to be read quickly before the words on the page mysteriously transform into something different Who's controlling our lives and are they getting even more levers to control us Is truth objective or just made up What did Orwell get right and did he get some things wrong Are social media opportunities for liberation or instruments of oppression How can we fight back against totalitarian control Can Big Brother compel us to love him How does the language we use affect the way we think Do we really need the unifying power of hate Why did Orwell make Nineteen Eighty Four so desperately hopeless Can science be protected from poisonous ideology Can we really believe two contradictory things at once Who surveils the surveilors      **Film Heritage** ,1970
