Canada-U.S. Tax Comparisons John B. Shoven, John Whalley, 2007-12-01 In the increasingly global economy domestic tax policies have taken on a new importance for international economics. This unique volume compares the tax reform experiences of Canada and the United States, two countries with the world's largest bilateral flow of trade and investment. With the signing of the U.S.-Canada Free Trade Agreement and the tax reforms of the 1980s, there has been some harmonization of tax systems. But geographic, cultural, and political characteristics shape distinct national social policies that may impede harmonization. As the U.S. and Canadian economies become even more integrated, differences in tax systems will have important effects in particular on the relative rates of economic growth. In this timely study, scholars from both countries show that while the United States and Canada exhibit similar corporate tax structures and income tax systems, they have very different approaches to sales tax and social security taxes. Despite these differences, the two countries generate roughly the same amounts of revenue, produce similar costs of capital, and produce comparable distributions of income.

Inflation Indexation: Current International Practices Vybhavi Balasundharam, Arika Kayastha, Mr. Marcos Poplawski Ribeiro, 2023-12-22 This paper presents a new global dataset on current practices for four budget items in terms of indexation to the price level and other nominal variables. Compiling data from documents of select multilateral organizations, governments, and related literature, as well as conducting a survey among IMF country desks of 190 country members, we show how indexation is internationally applied in i) personal income tax brackets, ii) pensions, iii) social assistance programs, and iv) public wages. The dataset shows that while indexation policies vary significantly across economies, some trends can be identified. For example, indexation is more common on pension and social grants than on taxes and falls with the degree of economic development. We further discuss some applications of this new dataset. Those include an accounting exercise illustrating the impacts of indexation on fiscal outcomes during episodes of inflation surprises and an analysis of the association between the overall degree of indexation combining the four budget items and inflation persistence.
